

THREE POINT FERTILIZER APPLICATORS

FEATURES

- 50 mesh main filter and 60 mesh feeder line filters prevent tip plugging
- Centrally located controls for convenient valve operation
- 160 lb SS. glycerin-filled gauge
- Light system consists of flasher / turn signal and taillights for added road safety
- Double bar (5x7) design provides maximum strength
- Hydraulic down pressure to keep coulters in the ground- can easily be adjusted without the use of tools
- The bar can be folded from 40' to 30' or 60' to 40' by folding the outer wings
- The "Kick Up" cylinder and "Folding" cylinder are on two separate hydraulic blocks - when the tool bar is unfolded the bar will be in the "Kicked" up position preventing the coulters from crashing into the ground
- Category "3" or "4" point "Quick Attach" three point hookup

Kick up Feature

Bar uses a center linkage with two cylinders attached. One cylinder is for folding and the second is for wing "Kick Up". This feature "kicks" the wings up 8 degrees to avoid knocking crops down when turning on headlands.
