# Tar River

Available in 2 popular sizes, the Tar River side-mounted Disc Mower is built strong to stand up to years of rough conditions, giving you an excellent, quality cut. The reinforced A-frame made of heavy square tubing with Category II & III three-point hitch and the durable compensation spring ensure stability and durability during work.

The V-Belt and Shear-Hub systems protect the cutter-bar in the case of hitting obstacles. The break-away system provides additional protection to the cutter-bar by allowing it to pivot backwards when it encounters an obstruction. Simply back the tractor up and the break-away bar and mower will reset into the working position.

The cutter-bar is designed for quick and easy replacement of each of the individual cutting units, which eliminates the need to take apart the entire cutter-bar for most repairs.

Models available: 5 and 6 disc configurations.

### Standard Equipment:

- ◇ PTO Shaft 460 Nm
- ◇ Heavy Cutter bar with SAFETY DEVICE SYSTEM
- ◇ Protective Barriers made of a Bent Pipe Profile
- ◇ Protective Apron—reinforced with a rubber collar
- ◇ Quick Blade Change System
- ◇ Spring-based relief system
- ◇ Adjustable lower hitch pins
- ◇ Break-Away System

# Disc Mowers

## MOWER FEATURES

**LIFTABLE FRONT COVER + PROTECTIVE APRON**  
Easy access to the cutter bar to replace knives or a damaged bearing assembly.

**HYDRAULIC CYLINDER**  
Facilitates maneuvering and transport of the machine.

**BREAK-AWAY BAR**  
Protects the mower from damage.

**SPRING RELIEF SYSTEM**  
Relieves the pressure of the cutter bar on the ground, increasing its life span:

- ◇ Increases the range of terrain following ability
- ◇ Infinite ground pressure adjustment
- ◇ 0" - 8" range of terrain following

Quick Blade Change System

## CUTTING BAR WITH SAFETY SHEAR-HUB

Shear Hub Protection for Heavy Cutter bar

Model	# of Discs	Blades per Disc	Working Width	HP	Weight (lbs.)	List Price
DCM2083	5	2	6' 11"	30	1,096	\$9,480
DCM2098	6	2	8' 2"	45	1,162	\$10,280

# DISC MOWERS

Available in 5 popular sizes, the Enorossi side-mounted Disc Mower is built strong to stand up to years of rough mowing conditions, giving you an excellent quality cut. The heavy duty A-frame with Category 1 & 2 three-point hitch and the strong compensation spring ensure stability and durability.

The V-Belt and Shear-Hub systems protect the cutter-bar in the case of obstacles. The break-away system provides additional protection to the cutter-bar by allowing it to pivot backwards when it encounters an obstruction. Simply back the tractor up and the break-away bar and mower will reset into the working position.

The cutter-bar is designed for quick and easy replacement of each of the individual cutting units, eliminating the need to take apart the entire cutter-bar for most repairs.

Models available: 4, 5, 6, 7, and 8 disc configurations; 3-blade discs available on 4, 6 and 8 disc models.

Disc conveyor bolted on top of guard support to avoid wrapping problems

Anti-wrapping support for heavy grass

Moves 90° for transport - will cut at 35° up or down for hills, banks, terraces, etc.

**Specifications:**

- ◇ “Sneak-A-Peek” belt tension viewer for less down time
- ◇ Compensation spring “break-away” system
- ◇ Heavy Duty shield PTO shaft with overrunning clutch
- ◇ Hydraulic cylinder lift mechanism
- ◇ High blade tip speed for smooth, fast cutting efficiency

Easy changing hubs with 4-bolt disc cutting unit

Easily adjust belt tension without taking off outer cover

Heavy Duty A-Frame

Individual Shear-hub System on cutter bar

3 Blade discs available for 4, 6 and 8 disc models

# DISC MOWER

The DM ROLL series offers the rubber roller conditioner to facilitate the drying of the grass. Its agile use makes it suitable for quick and safe work.

Offered in two sizes to meet every farm's need.

### Swath Adjustment Deflectors

The DMC ROLL Mowers have two rear reflectors that adjust the swath width which can be minimum of 60 cm (2 ft.) or maximum of 120 cm (4 ft.)

Rubber roller conditioner (standard).

# WITH CONDITIONER

### Special Disc for Conditioner

The disc is more robust with a specific reinforcement that allows the launch of the product inside the ROLL rollers helping the work and therefore the forward speed.

### Gear Transmission

The two rubber rollers are gear driven to provide continuous synchronization in the event of uneven flow of high-volume grasses.

Model	# of Discs	Blades Per Disc	Working Width	Lift	HP	PTO	Weight (lbs.)	Ship Weight (lbs.)	List Price
DMC 5 ROLL	5	2	7 ft.	Hyd.	80-90	540 rpm	1,760	2,030	\$19,450
DMC 6 3C ROLL	6	3	8 ft.	Hyd.	90-100	540 rpm	1,910	2,160	\$21,750

# TREX MOWER

A side drawbar is the main feature characterizing our pull-type Disc Mowers with Conditioner series DMC-TREX 290 – 320. The drawbar can be hydraulically shifted and the block valve ensures a secure locking system. It is possible to choose between models without conditioner, FLAX models with blades conditioner and ROLL models with roller conditioner. A perfect cutting quality is assured by the Enocut cutting bar system.

Standard tires 340/55-16 12PR and second wide angle PTO Drive shaft.

High Quality Cutting Bar with 2 Year Limited Warranty

### Specifications:

- ◇ Easy changing hubs with 4-bolt disc cutting unit
- ◇ Individual Shear Hub system on cutter bar
- ◇ Heavy Duty shield PTO shaft with overrunning clutch
- ◇ Hydraulic cylinder lift mechanism
- ◇ High blade tip speed for smooth, efficient, and fast cutting
- ◇ Adjustable Swath Diverter

Optional Wearproof Skids Available

# DRUM MOWERS

Make Sure to Check Tractor Weight!

Tar River Implements' Drum Mowers have very few moving parts, are low maintenance and have a heavy built A-frame. The Tar River Drum Mower is a great economic alternative to the Disc and Sickle bar mowers while still giving a good cut. The BDR Series Drum Mower can mow at high speeds and offers reliable mowing in all conditions, easily cutting through tall and thick grasses. Available in 4 popular sizes, Tar River Implements has a perfect fit for your small hay operation.

### Drum Mower Benefits:

- ◇ Mow at High Speeds
- ◇ No Hydraulics Necessary
- ◇ Few Moving Parts & Easy Maintenance
- ◇ Great Alternative to Disc & Sickle bar Mowers for Small Hay Producers
- ◇ Easily Cuts Through Tall and Thick Grass
- ◇ Designed for Reliable Mowing in All Conditions

### BDR Series Drum Mower Features:

- ◇ Heavy Duty A-frame
- ◇ 3 Blades per Drum (2 on the BDR-135 & 4 on BDR-210H)
- ◇ Compensation Spring "Break-Away" System
- ◇ High Blade Tip Speed for Smooth, Fast Cutting Efficiency
- ◇ V-Belt Drive
- ◇ Internal Overrunning Clutch
- ◇ Easy & Quick Blade Change

Model	# of Drums	Blades Per Drum	Category Hitch	Working Width	Min. Recommended Tractor Weight	Lift	Min HP	PTO	Weight (lbs.)	List Price

# SICKLE BAR MOWERS

These double action Sickle Bar Mowers with an adjustable 3 point hitch ensure a sharp clean cut on any type of grass. The safety breakaway bar helps protect the cutter from obstructions in the field.

Safety breakaway bar

### Specifications:

- ◇ Three Point Hitch Cat.1 & 2
- ◇ Double Action cutter bar
- ◇ Heavy duty shielded PTO shaft
- ◇ High quality powder-coat paint
- ◇ Cuts at 90° up and 70° down
- ◇ Safety release
- ◇ Ideal for hay or ditch bank mowing
- ◇ Extra cutting blade included

# HAY TEDDERS

55 MPH Transport Tires  
on 19' G4V 570

## VORTEX TEDDER

The Enorossi Vortex Hay Tedder comes in the 17', 19', 24', and 32' working widths. All units come standard with hydraulic lift, high-floatation 16" balloon tires, and fender hubs on the inside tires, Universal-Joint rotor style and a heavy 8"x4" rectangular-tube frame. The 19', 24', and 32' tedders come standard with hydraulic tilt.

The newest additions to the lineup are the Professional G6V 740PRO and G8V 980PRO. A 6 and 8 basket tedder with heavy transport frame allowing it to quickly fold up and speed from field to field.

# TAR RIVER

## PRZ-5500

The Tar River Tedder is built heavy in all the right places, this machine is designed to withstand the rigors of high-volume hay production.

The PRZ-3100 is a 10' tedder with 4"x8" tubing. This unit is a pull-type with a manual tilt and flat-bar tine arms. On the 18' PRZ-5500, large 18" tires give the tedder great floatation across uneven terrain. Adjustable angling allow boundary tedding. Thick-walled tubular tine arms hold up long after the flat bar style ones would have bent. Hydraulic tilt and fold come standard.

Thick-Walled Tubular Tine Arms

Adjustable Angle and Tilt

Hyd. Tilt and Fold

# HAY TEDDERS

## PRZ-3100

### Specifications:

#### PRZ-3100

- ◇ 10' Working Widths
- ◇ Overrunning Ratchet Clutch PTO
- ◇ High Flotation Tires
- ◇ Heavy Built, Rectangular Tube-Frame
- ◇ Packaged 2 per crate
- ◇ Manual Tilt

#### PRZ-5500 (includes all features of PRZ-3100 plus)

- ◇ 18' Working Width
- ◇ Wheel Fenders on Inside Tires
- ◇ Road Transport tires
- ◇ Hydraulic Lift
- ◇ Can be angled for "close to" fence tedding
- ◇ Hydraulic Tilt
- ◇ Heavy-walled tubular arms
- ◇ Integrated Locking collars and hex shaft drive units
- ◇ Double plated rotor supports
- ◇ Adjustable Wheel Yokes—Swivel and Tilt
- ◇ One Hydraulic Remote needed
- ◇ Overrunning Ratchet Clutch PTO

# ROTARY

## SINGLE AND DOUBLE ROTOR CONFIGURATIONS

Enorossi's Single & Double Rotary Rakes come standard with pneumatic pivoting wheels and heavy, tubular tine arms that are removable for transport. The RR-350 has 11 rotor arms that sweep cleanly all hay types in any condition.

The ENODUO 780 is a center delivery double rotary rake with an adjustable working width from 23' to 25'6". It comes with four wheels per rotor for excellent stability on uneven ground and is semi-mounted with rear steering wheels for maximum maneuverability. The gentle raking action ensures high nutrient levels remain on the crop and in the bale - not in the field.

Tandem Wheel Axles

Heavy Duty, Sealed Oil Bath G-box

Transport Position

### Specifications:

- ◇ Extra heavy duty frame and components
- ◇ Hydraulic transport lift standard
- ◇ Heavy-duty, sealed oil bath gearbox
- ◇ Large, high floatation tire
- ◇ Standard tandem axle
- ◇ Removable tine arms
- ◇ Great economic option for those smaller-range tractors and hilly conditions
- ◇ 20" Ground Clearance Hydraulic Lift for transport

# ROTARY RAKE

Tar River Implement's Single Rotary Rake comes standard with hydraulic height adjustment and heavy tubular tine arms that are foldable for transport. The ZRG-420 has 11 rotor arms that cleanly sweep all hay types in any condition. Wide angle constant velocity PTO shaft come standard. Replaceable wheel hubs ensure transportation is not a problem. The gentle raking action ensures high nutrient Leaves remain on the crop in the bale, not in the field.

The ZRG-360 is a 3-point version with a 9 arm gearbox for use in tighter areas where a pull-type will not allow you to reach all

## ZGR-420

### Tandem Suspension

Allows the rotor to float over any terrain while following ground contour perfectly. Replaceable wheel hubs on ZGR-420

### Foldable Tine Arms

Thick-Walled tubular tine arms, 4 or 6 of which fold for transport. Each arm is equipped with heavy tines.

## ZGR-360

### Specifications:

- ◇ 11'10" and 13' 9" working width
- ◇ 15x6.0-6 Tires on ZGR-360
- ◇ 18.850-8 Tires w/ transport hubs on ZGR-420
- ◇ Hydraulic Transport Lift on ZGR-420
- ◇ Thick-walled, tubular tine arms

# TEDDER RAKE

Enorossi's DR420 –2 Rotor Tedder Rake is ideal for medium-sized and large farms requiring a multifunctional machine. It's the ideal solution for farmers who want to obtain both central and lateral windrows depending on the quantity of the harvested material. It can perform many different tedding and raking functions always with optimal processing of your high-quality forage. Standard equipped with cardan shaft, protections, inverter and twin wheels. The high working speed of almost 10 mph allows outstanding performances.

Lateral Windrow

Tedding

Spheroidal cast iron cam and steel rollers.

Twin pivoting wheels

Center Windrow

# R-Rake

The RR-248 was designed with the needs of the small hay farmer in mind. Ted and Rake with a single machine.

With a 72" working width, this rotary rake is capable of delivering an excellent quality of performance while still being compact enough to be used with a 20 HP tractor.

The high-quality but affordable materials make this rake durable and a great choice for budget farms.

With the RR-248's combination of performance, durability, and affordability, it is the next-best-thing for

High Flotation Bearing  
Tires

Simple Cam System

Model	Working Width	Tine Arms	Tines	Weight (lbs.)	List Price

# BELT RAKE

Two machines in one - rake and ted with the Tar River Implements Belt Rake! With its compact design and versatile functionality, the Belt Rake is an ideal hay tool for the small to medium sized hay producer. Great durability and low maintenance as well as simplicity of use are just a few benefits for this tedder-rake combination Belt Rake.

The D150-3 is a low profile design that can operate with any HP tractor. Simple and easy to use with very low maintenance. The 3 tines per row make clean a sweep of your pasture. Fast adjustments allow one to go from tedding to raking in a breeze.

D180-4 comes standard with 4 double tines per row and all the features of the D150-3. This extra set of tines is helpful in heavier hay crop conditions.

## Specifications:

- ◇ Heavy square tubing construction
- ◇ Heavy duty belts for long life
- ◇ Rear Height adjustment wheels
- ◇ Front Pivot wheel

Model	Working Width	# of Belts	Tines x Crossbeam	Weight (lbs.)	List Price
D150-3	71"	2	3	408	\$3,990
D180-4	83"	2	4	485	\$4,455

# 3 POINT WHEEL RAKE

An easy and efficient hay rake suitable for any type of forage. The spring system of the tool holder allows raking wheels to adapt to any type of ground with the correct pressure and without affecting the forage quality. Independent and interchangeable raking wheels mount on tapered roller bearings. Teeth made of flexible steel.

- Specifications:**
- ◇ Heavy tubular frame with strategically placed bracing
  - ◇ Molded steel hubs with tapered roller bearings
  - ◇ 7 mm heavy spring steel teeth
  - ◇ High quality powder-coat paint

RP3C has a specifically designed A-frame for smaller sub-compact tractors.

Perfect tool for windrow turning or raking pine straw.

Model	# Wheels	Teeth per Wheel	Wheel Dia.	Work Width	Weight (lbs.)	List Price

# BAT RAKE

## HIGH CLEARANCE CARTED RAKE

60" Biggy Rake Wheels  
with 7.5 mm Tines Are  
Standard!

Raking wheels sit at a  
7° angle to create fluffier  
windrows and leave less  
hay in your fields!

**32" Ground Clearance**

Enorossi's Bat Rake is the new standard for Hay Rake Caddies. Available in 8, 10 and 12 wheel sizes, the Bat Rake comes in a Single Wheel configuration allowing each individual raking wheel to follow all types of ground contours. Equipped with 60" diameter raking wheels and 7.5 mm tines, the Bat Rake's raking wheels are arguably the best raking wheel on the market today. The heavy spring tines, provide for excellent wear and strong resistance to breakage. The heavy-built frame and high profile of the Bat Rake give a full 32" of ground clearance allowing it to rake in all types of ground contours in heavy hay conditions.

### Specifications:

- ◇ Independent rake wheel arms to follow all ground contours
- ◇ High Clearance - 32" of Ground Clearance
- ◇ Perfect for heavy hay
- ◇ Easy windrow width adjustment
- ◇ Heavy built and low maintenance
- ◇ 60" raking wheels with 7.5 mm tines
- ◇ Heavy built and low maintenance
- ◇ 205/70-15 tires standard
- ◇ Heavy tubular frame with strategically placed bracing
- ◇ Molded steel hubs with tapered roller bearings
- ◇ Double-action hydraulic cylinder
- ◇ Compact design

# MAXIMUS RAKE

## HIGH CAPACITY CARTED WHEEL RAKE

60" Biggy Rake Wheels  
with 7.5 mm Tines Are  
Standard!

**Shown w/ Optional Wind Guards & Kicker Wheels**

The MAXIMUS Rake has been designed to match the customer's high demands. It is available in 3 sizes; 12, 14, and 16 wheel configurations. All versions feature independent rake wheel arms using a unique double rod spring system to maintain constant pressure of the raking wheels to the ground. The heavy duty frame and wide tire spacing give great stability in heavy conditions.

### Specifications:

- ◇ Independent Rake Wheel Arms to Follow All Ground Contours
- ◇ Perfect for Heavy Hay
- ◇ Easy Windrow Width Adjustment
- ◇ 60" Raking Wheels with 7.5 mm Tines
- ◇ Heavy Duty and Low Maintenance
- ◇ Tandem Tires Standard
- ◇ Heavy Tubular Frame with Strategically Placed Bracing
- ◇ Molded Steel Hubs with Tapered Roller Bearings
- ◇ Optional 2 front/1 rear Kicker Wheel available

# MINI ROUND BALER

Perfect for the small farmer who wants to produce their own hay. It's low cost and a time saver. The affordable SRB-870 or SRB-870NW allows you to control when you bale, not others. The auto twine binding system alerts the operator, who simply pushes a button, to open the rear door hydraulically, thus dropping the bale.

The net wrapping system of the SRB-870NW works the same way except with even better weather resistance, and reduction of loss from heavy handling with net wrapping. The baler comes with a self-contained hydraulic pump. Only a connection to the tractors 12V battery is needed to operate the baler making it easy and mess free.

## SRB-870 Twine Baler

- ◇ 3 pt. Category 1 Hitch
- ◇ 18-30 HP
- ◇ Electronic Control Box
- ◇ Includes 1 Roll of 8500' Twine

## SRB-870NW Net Wrap Baler

- ◇ 3 pt. Category 1 Hitch
- ◇ 18-30 HP
- ◇ Electronic Control Box
- ◇ Includes a starter roll of net wrap (approx. 50 bales)

Model	Bales	Pickup	Tractor HP Min	Working Capacity	Weight (lbs.)	List Price
SRB-870	23" x 28"	2' 6"	18 HP	80-100 bales/hour	1,025	\$6,950
SRB-870NW	23" x 28"	2' 6"	18 HP	80-100 bales/hour	1,102	\$7,750

### REPLACEMENT TWINE/WRAP

TG0800	Replacement 8500' Twine	\$25 (Parts Discount)
SRBW006	Replacement 26" x 5000' Net Wrap Roll	\$125 (Parts Discount)

# STATIONARY BALE WRAPPER

**Econo-Wrap**

Bale Guides To Provide Even Placement of Film Wrap

Film Slicer At The End of Rotary Table Cuts Film After Bale Is Unloaded and New One Is Set Back On For Continuing Operation

Quality Components Such As The Hydraulic Motor & Bevel Gears Ensure Long Machine Life

Too much rain? Try wrapping your hay with the Econo-Wrap Single Bale Wrapper. The Econo-Wrap Bale Wrapper was designed with the average farmer in mind and is ideal for small-scale hay producers. This 3 Pt. Hitch Stationary model will wrap bales up to 4' x 5' round bales.

## Specifications:

- ◇ Wraps round bales up to 4'x5' (weighing up to 2,100 lbs.)
- ◇ Hooks up to 3 pt. Hitch and runs off of the auxiliary hydraulics
- ◇ When done wrapping, lift 3 pt. hitch to unload bale
- ◇ Unit is equipped with bale counter
- ◇ Approx. wrap time: 90 seconds

# SELF-LOADING

Upgrade your baling operation with the Econo-Wrap EW-1800TA, a streamlined wrapper designed for solo operators. With the ability to wrap bales up to 4' x 5', this fully automated machine requires only one button push to initiate the wrapping process.

Effortlessly fit the bale into the lifting arm cradle, press the button and watch as the EW-1800TA takes over—lifting the bale onto its turntable and beginning the automatic wrapping process. Enjoy the freedom to drive up to the next bale while the machine continues wrapping, dumping it only when fully finished.

The Econo-Wrap EW-1800TA is the perfect partner for your baling needs.

# BALE WRAPPER

**Econo-Wrap**

# TAR RIVER

Tar River Implements offers an economical solution to your seeding needs. The DRL-048 & DRL-072 come with double opening discs to plant grass, corn, beans, oats and more. The seeder comes equipped with two stainless steel boxes with closeable slides for each row. Apply fertilizer to each row while planting. The DLR is designed to be used as a secondary tillage tool. Ground conditions need to be worked up or tilled prior to use.

# CONVENTIONAL DRILL

FOR USE IN PREPARED GROUND

## Specifications:

# TAR RIVER

The SAYA-505 (55") & SAYA-507 (78") got a facelift! They are still cost effective Light Duty No-Till Drills with front coulter package, but with new and improved features.

The 505 has 7 and the 507 has 10 swept back spring loaded double disc openers making seeding easy and economical. The Large seed and Legume cups allow for precise seeding in a no-till operation. **Stainless steel hoppers** prevent rust and keep your drill in fine working shape for years to come.

The **NEW** SAYA-907 has a 78" working width and comes with a 3 compartment seedbox which contain 3 different seedcups for seeding of any type of seed.

The front section comes with a dual section seedcup that splits between large seeds (corn and soybean sizes) to grass seeds such as wheat and rye. The middle section has a flow adjustable gearbox with special gear seedcups designed for the fluffy warm season Native grasses. There is no need to change chains and sprockets to adjust the flow. A simple handle on the gearbox smoothly increases or decreases seed output.

Both the front and middle seedcups feed into a heavy cast iron double disc opener.

The rear box contains high precision metering seedcups for the tiny legume seeds. Seeds dispersed from these cups are spread out behind the machine in order to prevent them from becoming buried too deep.

**Quick Hitch Compatible**

## SAYA-507

Warm Season Native Grass Box available on **SAYA-907 ONLY**. Perfect for metering Virginia Wildrye, Yellow Indiangrass, or a variety of other native grasses

# NO-TILL DRILL

## SAYA—Light Duty No-Till Drill For use in Light No-Till Applications

# GREENSCAPE

## 750 SERIES

High Precision Large Seedcup

Smaller Legume Seedcup

Greenscape 750 FOOD PLOTTER No-Till Drills are the latest in the Greenscape family of the most reliable seeders produced in the US over the past 20 years. High precision seed boxes and flow control make seeding a breeze with the ability to drill many different varieties and sizes of seed into all types of planting conditions.

Heavy built, but constructed to be able to be handled by tractors as low as 40 HP, The FOODPLOTTER line is designed for planting deer food plots around woodlands or high precision pasture seeding in the fall.

The 10 coulters at 7.5" High precision large seed seedcups accurately drop seeds into the openings. A separate Legume Seedbox with high precision seed cups accurately drop seed along a "splash pan" that rains the small seed over the soil. A packer roller system with Nylon rings or optional cast iron rollers help press the seed into the ground and close up the cuts made by the disc openers.

The NEW 750-4 has all the same great qualities of the 750-2 but with a Warm Season Native Grass Box. Perfect for metering Virginia Wildrye, Yellow Indiangrass, or a variety of other native grasses!

### Specifications:

- ◇ Three Point Hitch Cat. 1&2
- ◇ Heavy tubular frame construction
- ◇ All ground driven, no PTO shaft or gearbox to maintain
- ◇ Precise seed metering cups with individual clean out gates
- ◇ Rear roller packer rings to firm and smooth seedbed
- ◇ Water tight seed box with agitator shaft - calibration chart and seeding rate chart
- ◇ 10 Cast Iron double disc openers spaced at 7.5"
- ◇ Spring loaded coulters to cut through tough ground
- ◇ Optional Cast Iron roller rings

# GREENSCAPE

The Greenscape represents a totally new concept in seeding. Being neither a grain drill nor a PTO driven seeder, the Greenscape effectively prepares the soil, drops and lightly covers the seed, and then firmly presses the soil for a perfectly prepared seedbed. It is designed to achieve a perfect pattern across the working width of the machine; no row effect as with drills or knife type over seeders.

Ground driven – no PTO shafts or gearboxes to maintain, and requires only a 35 HP (50 HP on 84” model) tractor to operate. When equipped with the optional precision small seed box and Native Seed box the Greenscape will plant virtually any type or size seed at any rate.

This machine will seed into all conditions, including primary seeding into prepared ground or overseeding into existing vegetation. Available in 60” and 84” working widths.

## Specifications:

- ◇ Three Point Hitch Cat. 1&2
- ◇ Heavy tubular frame construction
- ◇ All ground driven, no PTO shaft or gearbox to maintain
- ◇ Precise seed metering cups with individual clean out gates
- ◇ Rear roller packer rings to firm and smooth seedbed
- ◇ Water tight seed box with agitator shaft - calibration chart and seeding rate chart
- ◇ Driven spiked rollers crumble soil just enough for perfect seed-to-soil contact
- ◇ Exclusive Torque Arm - keeps constant adjustable down pressure on rear cultipacker
- ◇ Broadcast across full width of working area - no row effect as with PTO driven, knife type machines or sod drills

## Benefits:

- ◇ High ground speed – up to 7 MPH
- ◇ Full width broadcast coverage  
*NO ROW EFFECT*
- ◇ Seed or overseed in any condition
  - Fields
  - Groomed Turf
  - Prepared ground
- ◇ Abrasive-Resistant mining steel tines for extremely high wear
- ◇ Front Roller aggressively drives second roller 42% faster
- ◇ High quality – High precision seed cups for precise seed distribution
- ◇ Seed disengagement system for aeration & Seedcup safety shear pin
- ◇ Reinforced Nylon or Cast Iron corrugated roller rings
- ◇ Quick Hitch compatible reinforced three-point (Cat 1 & 2)
- ◇ Available Hoppers
  - Standard Large-Seed Box
  - Precision Legume Seed box
  - Native Grass Seed Box
  - Stainless Steel Fertilizer box

Front Pulverizer Bar

# DISC HARROW WITH SEEDER

The DHDS-63 is a durable disc harrow with seeder. It is equipped with 10 disc heads in the front and back, which efficiently cuts and pulverizes the soil, creating an ideal seedbed for optimal germination. With its adjustable disc heads and precise seed metering system, the DHDS-63 provides accurate and uniform seed distribution. The front box distributes the seed into the disced soil. This allows for a deeper planting depth. The rear seed box has the legume seed cups and the seeds are distributed behind the disced area and rolled in the ground by the rear roller.

**Quick Hitch Compatible**

**Transport Position**  
Unit Folds into Transport Position for easy and hassle free moving.

Model	Working Width	Working Depth	Min HP Req	Front Cup/Rear Cups	Disc Heads	Cat. Hitch	Weight (lbs.)	List Price
DHDS-63	63"	3" - 4"	25	7	10 (front & rear)	1	803	\$7,250

# CRIMPER

**Quick Hitch Compatible**

The Tar River Implement Roller Crimper is a tool designed to terminate cover crops by crimping the stalk rather than cutting it during its “dough stage”. This process has several benefits, including the conservation of soil moisture, reduction of erosion, lessens the need for herbicides and addition of organic matter to the soil. It also suppresses weed growth and helps to cool soil temperatures during the summer months.

It is available in an 6’ and 8’ working widths and is a useful tool for farmers and agricultural professionals who want to manage their soil health.

Model	Working Width	Overall Width	Min. HP	Cat. Hitch	Weight (lbs.)	Max Weight w/ Water	List Price

# DITCH BANK MOWERS

## ENERGY SERIES

Ditch bank mower for the smaller compact tractors with HP ratings from 20-50 HP. Popular sizes of 51" and 61" working widths make the Energy series ditch bank mower a "must have" for small farms that need to keep up mowing around ponds and ditches. The Energy ditch bank mower comes with a self-cleaning roller, counter knife, and free-wheel protection integrated inside the gearbox. A safety and self levelling breakaway system is a standard feature. Cat 1 hitch

## YOUNG SERIES

If you need 65 inches of cut, then the YOUNG series is the mower for you. Heavy frame and gearbox for tractors up to 65 HP.

3 Year warranty on the cast iron components, self cleaning roller, counter knife and free-wheel protection inside the gearbox.

Hammer knives hold up under harsh conditions.

Cat 1 hitch

## COMPETITION GS SERIES

The heavy duty COMPETITION GS Series is built tough for commercial applications. Double thick HARDOX (AR400 Equivalent) frame will hold up to the punishment for cutting road sides as well as ponds and ditch banks. 3 Year warranty on the cast iron components, self cleaning roller, counter knife and free-wheel protection inside the gearbox. Internal rotor bearings are protected from most impacts. Double-tapered roller bearings keep it rolling much longer than pillar block bearings. Comes standard with DOUBLE WIDE ANGLE PTO SHAFT.

Cat 2 hitch

CP-84L	84"	18-40	578	\$3,096

# SHANK CULTIVATOR

The Tar River Implements Spring Loaded Cultivators are available in three sizes. They come in 36", 54" and 72" working widths and are made using 3/8" Steel angle iron with 3/4" wide shanks.

## Specifications:

- ◇ Suitable for stone and root filled soil; light and medium soil conditions
- ◇ Used for loosening and aerating soil up to 9 inches below the surface
- ◇ Prepares seedbeds quickly and economically
- ◇ When one tine strikes a hidden obstruction the others continue to work at the correct depth.
- ◇ Strength derived from heavy duty shanks, which once fixed to the frame cannot move or strain out of position
- ◇ Shovel to Shovel Distance 15"
- ◇ Height 21"

# LAND LEVELER

Tar River Implements is proud to introduce the LB Series Land Leveler available in 3 popular sizes. These sturdy built units are great for a variety of applications from landscaping to work around the farm or homestead. Because they are not designed to move dirt, a lower HP tractor can use these.

Scarifier shanks (standard) and grading blades are multi-adjustable.

### Specifications:

- ◇ Cat. 1 Quick Hitch Adaptable
- ◇ Clevis Hitch
- ◇ Adjustable Grading Height & Ripping Shanks
- ◇ Replaceable Skid Shoes
- ◇ Scarifier Shanks come standard

# WOOD CHIPPERS

The Tar River Wood Chipper is the perfect tool to help you clear your land of fallen limbs and branches. Use your wood chips to create beautifully covered flowerbeds and natural areas in the yard. Wood chips not only look nice, but they also help regulate soil temperature, retain moisture and even improve plant growth by helping release necessary nutrients into the soil.

The BWC-040EC is a manual feed chipper. It is PTO driven and available in a 4" chipping capacity.

The BWC-H Series are Self-Contained Hydraulic Feed Chippers. This series is available in 4", 6", and 8" chipping capacities. These chippers come equipped with internal hydraulic pumps that are run by the tractor PTO and require no external hydraulic feed.

Introducing the BWC-07DH to the Tar River Implements line of chippers. This chipper is a self contained Dual Hydraulic Roller Feed chipper. It has a 7" chipping capacity but a larger opening on the chute.

  - ◇ Euro/Global optional at additional costs—use prefix “EG”.
  - ◇ JD Mounts optional at additional costs—use prefix “JD”.
- Mounts fit these loaders:
  - ◇ 200X, 200CX, 210, 300, 300X, 300CX, 400, 400X, 400CX, 520, 521, 540, 541, 542
- ◇ Hydraulic Hoses & Flat Faced Couplers come standard when necessary with all units except when noted otherwise.

# PALLET FORKS - BUCKETS - GRAPPLES

## PALLET FORKS

Model	Description	Loader	Capacity	Fork Lengths	Weight
SCPF	Sub Compact	Sub-Compact	900 lbs.	36" or 42"	190 lbs. - 205 lbs.
CPF	Compact	Compact	2,000 lb. & 3,000 lb.	42" - 48"	235 lbs. - 274 lbs.
EPF	Economy	Compact or Utility	4,200 lb.	48"	395 lbs.
MPF	Medium Duty	Utility or Larger	4,200 lb.	42" or 48"	376 lbs. - 394 lbs.
HPF	Heavy Duty	Utility or Larger	5,200 lb.	48" or 60"	414 lbs. - 460 lbs.
WTPF & WTHPF	Walk Through	Skid Steer	4,200# & 5,200 lb.	42" - 48" - 60"	378 lbs. - 394 lbs.
HYPF	Hyd. Side Shift	Utility or Larger	4,200 lb.	48"	436 lbs.

## BUCKETS

Model	Description	Typical Uses
RB	Rock Bucket	Essential attachment for separating rocks from dirt as well as for clearing and building sites. Ideal for sifting out large rocks and debris. Catches rocks 3" plus.
LP	Low Profile Bucket	High visibility specifically designed for skid steer loaders. For general purpose grading and moving dirt.
LB	Long Bottom Bucket	Built heavy for large skid steer applications. An excellent attachment for precise grading and construction purposes. 35 1/2" deep to allow for easy view of front edge while working.
CU	Compact Utility	All around general purpose specifically made for tractor loaders.
XMB	Material Bucket	Material /Snow / Litter bucket is used for moving litter, chips, snow and other light material.
4N1	4-IN-1 Bucket	Multi-purpose bucket for grappling, dozing, backfilling , loading, digging and fine grading
DB	Disbursement Bucket	Bucket attachment for carrying concrete, filling grain feeders, moving gravel and dirt. .85 Yard struck Capacity
HDB	High Dump Bucket	This bucket allows an extra 3 feet of dumping height for full loading capacity of truck or spreader.
HDGB	Grapple Bucket	Multi-purpose tool combining bucket and grapple
SB	Stump Bucket	Attachment bucket designed to dig around stumps with its narrow cutting surface for easy stump removal. Great for digging narrow ditches for footings or storm ditches.

## GRAPPLES

Model	Description	Typical Uses
RG	Rock Grapple	A fundamental implement for separating rocks from dirt as well as for contractors clearing a lot for site building. It is also essential for storm damage clean up. The Rock Grapple is ideal for sifting out large rocks and debris. It is excellent in pastures, lawns or construction sites. It will catch any rock or piece of debris that is larger than 3 inches
SBG	Stump Bucket	Used for prying and removing stumps with the gripping power to secure the load
RG	Root Grapple	Moving logs, brush, rocks or many other types of debris. Available in single and double grapple configurations CRG (< 40 HP) HDRG1 (35-50 HP) HDRG2 (40-60HP) XRG (60+ HP)
BG	Brush Grapple	Deigned for tearing into roots, trash and rubbish and loading the debris into trucks or wagons. Designed to roll debris into tight piles.
HFG	Fork Grapple	An essential tool on the farm, logging and construction industry. Great for moving logs, fence posts, pipes and debris.
FG	Log Grapple	Unique rounded tine design to easily hold large logs, pipes, fence posts and culverts.

# VIBRATORY POST DRIVER

Tar River Manufacturing Post Drivers are designed to efficiently drive posts and break concrete on your skid steer. The vibratory action makes quick work driving posts into the ground. Both models come with a 8” post pad.

The action of the “jackhammer” drive allows you to drive posts with minimal post splitting common on typical drivers. The cup design of the post pad keeps the post positioned and allows it to be pulled or pushed straight if it begins to angle off course while being driven.

Model	Description	Ft. lbs. Energy	GPM	Post Pad Size	Mount	Weight	List Price
<b>VIBRATORY POST DRIVER</b>							
PD-68-200	Post Driver	750 lbs.	10.5-19	8”	Uni. Skid Steer	1,200 lbs.	<b>\$5,315</b>
PD-75-240	Post Driver	1,000 lbs.	13-24	8”	Uni. Skid Steer	1,650 lbs.	<b>\$6,255</b>

# LAND PLANE

Grade your land professionally with the Tar River land plane.

Built with heavy steel, this leveler will make short work of your grading needs on your farm, construction site or driveway.

Available in 6 and 8 foot working widths, the TRLP is the ideal tool for tackling many landscaping jobs.

Model	Description	Mount	Weight	List Price
TRLP72	72" Land Plane	Universal Skid Steer	209 lbs.	\$1,470
TRLP84	84" Land Plane	Universal Skid Steer	243 lbs.	\$1,795

# HEAVY DUTY BRUSH CUTTER

## TRBC60

Low profile blade assembly with Anti-wrapping rotor protection gives superior strength than with traditional designs

### HEAVY DUTY BRUSH CUTTER

- ◇ Low-Flow Cutter (14/23)
  - ◇ Open-Faced, Heavy Duty Deck made with 1/4" A36 Steel
  - ◇ 5" Cutting Capacity
  - ◇ Hydraulic Direct Drives & Internal Relief Valve
  - ◇ Bi-Directional Cutting
  - ◇ 3 Cutting Blades (AR-500 steel)
  - ◇ Units Come Standard With Flat Faced Couplers & Hoses
  - ◇ Standard Universal Skid Steer Mount

# LIMITED WARRANTY

Belco Resources Equipment warrants to the original purchaser of any new piece of machinery from Belco Resources Equipment, purchased from an authorized Belco Resources Equipment dealer, that the equipment be free from defects in material and workmanship for a period of one (1) year for non-commercial, state, and municipalities' use, ninety (90) days for commercial use from date of retail sale. The warranty for rental purposes is thirty (30) days. The obligation of Belco Resources Equipment to the purchaser under this warranty is limited to the repair or replacement of defective parts.

Replacement or repair parts installed in the equipment covered by this limited warranty are warranted for ninety (90) days from the date of purchase of such part or to the expiration of the applicable new equipment warranty period, whichever occurs later. Warranted parts shall be provided at no cost to the user at an authorized Belco Resources Equipment dealer during regular working hours. Belco Resources Equipment reserves the right to inspect any equipment or parts which are claimed to have been defective in material or workmanship.

This limited warranty does not apply to and excludes wear items such as shear pins, tires, tubes knives, blades, or other wear items. Oil or grease is not covered by this warranty.

All obligations of Belco Resources Equipment under this limited warranty shall be terminated if:

- Proper service is not performed on the machine.
- The machine is modified or altered in any way.
- The machine is being used or has been used for purposes other than those for which the machine was intended.

## DISCLAIMER OF IMPLIED WARRANTIES & CONSEQUENTIAL DAMAGES

Belco Resources Equipment obligation under this limited warranty, to the extent allowed by law, is in lieu of all warranties, implied or expressed, including implied warranties of merchantability and fitness for a particular purpose and any liability for incidental and consequential damages with respect to the sale or use of the items warranted. Such incidental and consequential damages shall include but not be limited to: transportation charges other than normal freight charges; cost of installation other than cost approved by Belco Resources Equipment; duty; taxes; charges for normal service or adjustment; loss of crops or any other loss of income; rental of substitute equipment, expenses due to loss, damage, detention or delay in the delivery.

## REGISTRATION

The online Warranty Registration must be completed in order to qualify for coverage on this Limited Warranty. Visit [www.BR-Equipment.com](http://www.BR-Equipment.com), click on "Warranty Registration" and completely fill out the form to register the new piece of equipment.

## EXTENDED WARRANTY

A two (2) or four (4) extended Gearbox Limited Warranty is provided for certain models at the end of the standard one (1) year warranty period. Extended Warranty does not cover labor or freight.

## ITEMS NOT COVERED

1. Owner Responsibility Parts: Some items must be serviced

and/or replaced because of normal machine usage. These are defined as "OWNER RESPONSIBILITY" items.

- "V" Belts – "V" belt service life varies due to application and conditions, such as:

Sandy abrasive conditions, slippage, burning due to overloading, improper adjustment, and engagement, etc. Thus, the service of a "V" belt may be measured in days to years. "V" belt replacement is normally an owner's responsibility.

- **Ground engaging and Cutter Parts** – (including tines, mower blades, wear plates, guide wheels, etc.) These parts are subject to wear, abuse, and replacement. Service life of these parts can vary from hours to years. The replacement of this category of parts is the owner's expense.
- **Tires** – Tires are matched to the normal operation of the machine. Excessive road use, abrasive field conditions, obstacles, improper inflation, etc. will drastically effect service life. Therefore, repair or replacement of tires is the owner's expense.
- **PTO's** – PTO shafts are exposed to numerous conditions that the manufacturer has no control over. **From the startup of a new machine, it is critical that they be "sized" to the specific tractor that the machine is being attached to. This must be the responsibility of the owner, with the aid and advice of the dealer.** Many dealers take this responsibility as part of the sales process; however, the owner must be aware of this issue in switching implements between tractors. Proper angle of operation is as critical as "sizing". Improper alignment will quickly damage a PTO shaft. Running a PTO during a sharp turn can cause serious damage. Machine to tractor PTO shafts are an owner's responsibility and are not a warranty item.

2. Failure due to abusive usage, lack of maintenance or accident: All repairs are the owner's expense for failures resulting from abusive usage, lack of maintenance, and/or accident.
3. Failures due to unauthorized alteration of machine or installation of unauthorized attachments: The installation of unauthorized attachments or the unauthorized alteration of a machine may overload certain components and result in unexpected repairs or overhaul. Any failure from the above is at the owner's expense.
4. Tractor Loader Attachments designated in PriceBook as "Tractor Loader Only" WILL NOT qualify for warranty if used on a SKID STEER.

# LIMITED WARRANTY

Warranty terms and conditions according to the law in force, except different written agreement between the parties.

The warranty is limited to the free replacement of the parts that presented defects in materials or workmanship that make them unsuitable for their intended use.

The parts to repair or replace must be sent to the headquarters of the seller at the expense and risk of the purchaser; repaired and replaced parts will be delivered free of establishments selling, remaining packaging to the buyer, as well as the costs for the intervention.

The buyer loses the right to the warranty:

- If he does not observe the terms of payment;
- If the claimed defects are originated by the facts of the buyer, its employees or third parties in general, also in case of misuse;
- If first of complaint to the seller, the buyer directly or through third parties, worked on the parts under warranty;
- If he fails to perform to contractual services

No guarantee will be due in the event of defects arising from bad maintenance, negligence or incompetence in the use, modification or tampering performed by the purchaser as well as force majeure. Excluded are normal wear and normal wear and tear.

In none of the cases provided from this article the purchaser may demand the termination of the contract or damages, direct or indirect, of any nature.

Any dispute, subject to revocation, will have to be made to the seller in writing and with specific indication of the defects complained, within eight days of discovery.

## **3 YEARS WARRANTY ON CAST METAL PARTS.**

Warranty must be activated on our website [www.orsigroup.it](http://www.orsigroup.it) entering Customer Service/Warranty Registration and filling the related form.

The form must be completed in any its part within **15 days**. the date of delivery (it is valid the date of the bill). If we don't receive the Warranty Certificate **18 months** after the date of invoicing by Orsi Group, the warranty is deemed to have expired.

There is no warranty on parts chromed, painted, etc. or on products left outside and not well maintained and protected during the warranty period.

# LIMITED WARRANTY

S3 Delta Harrows Inc. warrants that all Equipment purchased from an authorized S3 Delta Harrows Inc. Dealer in the United States or Canada shall be free from defects in workmanship and materials for a period of two (2) years from the date of purchase (“Warranty Period”).

The Warranty described herein is provided by S3 Delta Harrows Inc. to the original purchaser of the Equipment from an authorized S3 Delta Harrows Inc. Dealer. The Warranty is transferable during the Warranty Period provided the authorized Dealer from which the Equipment was purchased is notified in writing within ten (10) days of the change in ownership, the transferee provides the Dealer proof of purchase from the original purchaser, and the transfer is approved by S3 Delta Harrows Inc..

S3 Delta Harrows Inc., at its option, will repair or replace any part covered by the Warranty in the previous section during the Warranty Period on the following conditions:

- (a) The End User shall notify the Dealer of the defect within thirty (30) days of failure;
- (b) The End User shall produce proof of purchase together with photographs or such other proof of failure as may be requested by S3 Delta Harrows Inc. or the Dealer;
- (c) Any Warranty repairs shall be performed by the authorized selling Dealer or other Dealer approved by S3 Delta Harrows Inc.; and
- (d) S3 Delta Harrows Inc. determines in its sole and absolute discretion that the defect or failure is covered by the Warranty.

Warranty repairs or replacement shall be free of charge to the End User for materials, labor and shipping in Year 1 of the Warranty Period. S3 Delta Harrows Inc. shall repair or replace any parts under Warranty in Year 2, but the End User shall be responsible for labor and shipping charges in Year 2.

## NOT COVERED BY WARRANTY

S3 Delta Harrows Inc. shall not be responsible for the repair or replacement of:

- (a) Defective parts or subassemblies incorporated in Equipment that are warranted under original manufacturing warranties from OEM or third party suppliers;
- (b) Equipment that has been altered or modified in any manner not approved or authorized by S3 Delta Harrows Inc.; or
- (c) Damage caused by normal wear and tear, lack of reasonable and proper maintenance, failure to follow operating instructions in the Operator’s Manual furnished with the Equipment, misuse or excessive use, or damage caused by accident, vandalism or Act of God

## CUSTOMER RESPONSIBILITIES

In order to benefit from the Warranty set out herein, the End User must:

- (a) Notify the Dealer of the defect within thirty (30) days of failure;
- (b) Produce proof of purchase together with photographs or such other proof of failure as may be requested by S3 Delta Harrows Inc. or the Dealer;
- (c) Retain the defective part or subassembly for a minimum of ninety (90) days following notification of failure to the Dealer and return the defective part or subassembly to the Dealer if so requested at any time during the ninety (90) day retention period. Failure to return the part or assembly to the Dealer within thirty (30) days of request by S3 Delta Harrows Inc. may result in disallowance of the Warranty claim (if no request for return of the defective part is made by S3 Delta Harrows Inc. within the ninety (90) day retention period, the End User may dispose of the defective part or sub-assembly).

# LIMITED WARRANTY

## WARRANTY AGREEMENT PROCEDURE

### Liability for Defects

ENOAGRICOLA ROSSI Srl, in its capacity of manufacturer of ENOROSSI Products shall be liable for any material and/or manufacturing defects or faults of the ENOROSSI Products according to the terms and conditions of this clause (hereinafter referred to as the "Warranty").

The Warranty is for a term not to exceed 12 (twelve) months from the date on which said products are delivered to the first end user.

The Warranty is limited to the parts of ENOROSSI Products manufactured by ENOROSSI (either directly or through other companies of the group to which it belongs).

1.1. Within the above stated time-limits, the Warranty shall apply according to the following limitations.

- i) The Warranty shall not apply if Distributor had failed to comply with its obligations provided for under this article, or if ENOROSSI Products have been used in any other way than those ones indicated in the instructions supplied by ENOROSSI or they have been repaired, assembled, dismantled or adjusted by unauthorized persons, or if the damage is due to the use of components manufactured by third parties and not approved by ENOROSSI, or due to the use of farming or non-farming equipment that was not connected correctly and in any case not approved previously by ENOROSSI, as well as in case such changes have been made without ENOROSSI's written approval.
- ii) The Warranty does not cover damages due to force majeure, to the use of lubricants which are not suitable for the purpose or in any case do not comply with the instructions and guidelines set forth in the "Manual for Use and Maintenance" of ENOROSSI Products; damages due to overloading are expressly excluded as well.
- iii) Any obligation of ENOROSSI under the Warranty shall in no case exceed the ex-works value of the material and therefore does not include labour cost, transfer or similar charges. Materials subject to usual wear and tear, pipes, filter parts, belts, etc., are not covered by the Warranty.

1.2. In any case, Distributor undertakes to supply to the Customer at least the same form of warranty as provided for hereunder, starting from the date of delivery of the ENOROSSI Products to the first end user, and this for the minimum period required by laws in force in the territory defined in the Agreement, without any further costs, expense or obligation of ENOROSSI than those ones defined above. Distributor shall remain liable for any warranty delivered to the Customer, irrespective of any expiration of the Warranty.

1.3. Prior to delivery to Customers, ENOROSSI Products shall be checked and tested (at Distributor's expenses) in order to eliminate possible inconveniences that might have occurred during transportation or shipment. By the time of delivery to Customers, ENOROSSI's instructions shall be given in detail and carefully to the Distributor with respect to maintenance and use of such ENOROSSI Products. The Distributor shall also, at its own expenses, carry out the first and second service to the first end user.

- 1) For each ENOROSSI Product, a REGISTRATION FORM Certificate shall be supplied by ENOROSSI (PDF) printed form (see Annex no. 1 RF).

Upon delivery of ENOROSSI to the Customers, the Distributor must shall:

- i) duly fill in the REGISTRATION FORM
- ii) print the duly filled REGISTRATION FORM, sign it and have it signed by the first end user as acceptance of ENOROSSI product and as acknowledgement of all use and maintenance instructions given to the first end user; sending a copy to : [service@enorossi.it](mailto:service@enorossi.it)
- iii) carefully keep the signed copy of the REGISTRATION FORM, for 5 (five) years

- 2) in case the ENOROSSI Products remaining unsold for more than 12 (twelve) months after the date of the invoice issued by ENOROSSI, prior to delivery to the first end user, the Distributor shall carry out a deeply Dedicated Pre Delivery Inspection.

1.4. All claims will be rejected unless all the complete documentation set (REGISTRATION FORM, WARRANTY CLAIM FORM, PICTURES) All repairs to ENOROSSI Products during the term of this Warranty shall be made at the care of Distributor, using the required original spare parts available in its warehouse. Should the necessary material be not available, the Distributor shall order the parts to ENOROSSI.

Spare parts shall be delivered and invoiced to Distributor by ENOROSSI. After having repaired ENOROSSI Products, the Distributor shall deliver to ENOROSSI, within 15 days from the date of the service, the ("WARRANTY CLAIM FORM"), supplied by ENOROSSI (PDF) printed form (see Annex no. 2 RG).

ENOROSSI may either accept or reject such Warranty claim, at its final judgment. The WARRANTY CLAIM FORM shall be filled in all parts; Distributor shall take care of describing all technical reasons and conditions of use that requested intervention under the Warranty.

Should the Claim be accepted by ENOROSSI, the latter shall inform the Distributor delivering a statement which will contain the outcome result, within 30 (thirty) days.

Defective material, object of any Warranty claim, shall remain at ENOROSSI's disposal since ENOROSSI may request, and, if necessary, such material shall be shipped to ENOROSSI plants for technical inspection. In such case, transportation costs shall be borne by ENOROSSI. Distributor may destroy the defective material, object of any claim, only upon receipt of ENOROSSI's written statement which contains the exit of the Warranty claim.

Parts replaced under the Warranty shall be reimbursed at the current gross price-list value in force at the date of the warranty request. The parts to replace will be invoiced to the Distributor at 45% (forty-five per cent) on the current gross price-list value in force at the date. If the parts are in stock by the Distributor, ENOROSSI will send the part in the next shipment (container or truck with other machines/parts in order).

The distributor will invoice to ENOROSSI the part(s) at the same value of the invoice issued by ENOROSSI, plus the expenses/taxes paid by the Distributor to their customs, the Distributor must show all the details of these expenses/taxes to ENOROSSI.
