Disc Mower

Available in 3 popular sizes, the Tar River side-mounted Disc Mower is built strong to stand up to years of rough conditions, giving you an excellent, quality cut. The reinforced A-frame made of heavy square tubing with Category II & III three-point hitch and the durable compensation spring ensure stability and durability during work.

The V-Belt and Shear-Hub systems protect the cutter-bar in the case of hitting obstacles. The break-away system provides additional protection to the cutter-bar by allowing it to pivot backwards when it encounters an obstruction. Simply back the tractor up and the break-away bar and mower will reset into the working position.

The cutter bar is designed for quick and easy replacement of each of the individual cutting units, which eliminates the need to take apart the entire cutter-bar for most repairs.

Models available: 5,6 and 7 disc configurations.

Specifications:

- ◊ PTO Shaft 460 Nm
- ◊ Heavy Cutter bar with SAFETY DEVICE SYSTEM
- ◊ Protective Barriers made of a Bent Pipe Profile
- ◊ Protective Apron—reinforced with a rubber collar
- ◊ Cat. 2 and 3
- ◊ Quick Blade Change System
- ◊ Spring-based relief system
- ◊ Adjustable lower hitch pins
- ◊ Break-Away System
- ◊ 2 Year Limited Warranty on cutter bar

Prices and specifications subject to change without notice. Check discounts & availability before quoting. Product Designs May Differ Slightly Than What Appears in the Photographs.

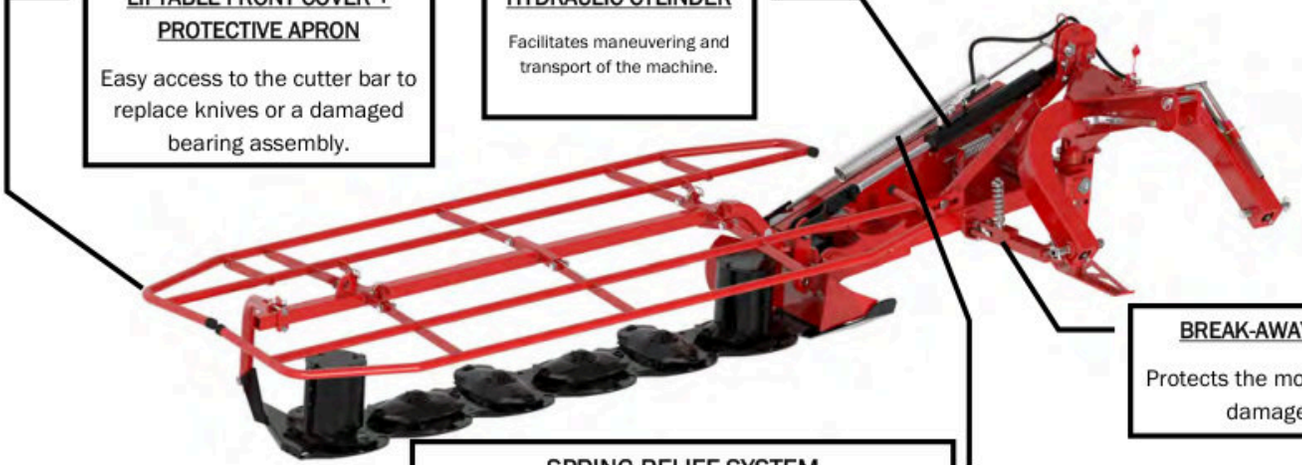

MOWER FEATURES

LIFTABLE FRONT COVER + PROTECTIVE APRON

Easy access to the cutter bar to replace knives or a damaged bearing assembly.

HYDRAULIC CYLINDER

Facilitates maneuvering and transport of the machine.

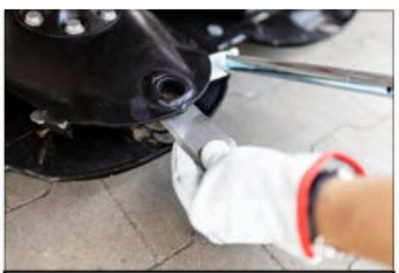

BREAK-AWAY BAR

Protects the mower from damage.

SPRING RELIEF SYSTEM

Relieves the pressure of the cutter bar on the ground, increasing its life span:

- ◊ Increases the range of terrain following ability
- ◊ Infinite ground pressure adjustment
- ◊ 0" - 8" range of terrain following

Quick Blade Change System

CUTTING BAR WITH SAFETY SHEAR-HUB

Shear Hub Protection for Heavy Cutter bar

Disc Mower

Available in 5 popular sizes, the Enorossi side-mounted Disc Mower is built strong to stand up to years of rough mowing conditions, giving you an excellent quality cut. The heavy duty A-frame with Category 1 & 2 three-point hitch and the strong compensation spring ensure stability and durability.

The V-Belt and Shear-Hub systems protect the cutter-bar in the case of obstacles. The break-away system provides additional protection to the cutter-bar by allowing it to pivot backwards when it encounters an obstruction. Simply back the tractor up and the break-away bar and mower will reset into the working position.

The cutter-bar is designed for quick and easy replacement of each of the individual cutting units, eliminating the need to take apart the entire cutter-bar for most repairs.

Models available: 4, 5, 6, 7, and 8 disc configurations; 3-blade discs available on 4, 6 and 8 disc models.

Disc conveyor bolted on top of guard support to avoid wrapping problems

Anti-wrapping support for heavy grass

Moves 90° for transport - will cut at 35° up or down for hills, banks, terraces, etc.

Prices and specifications subject to change without notice. Check discounts & availability before quoting.
Product Designs May Differ Slightly Than What Appears in the Photographs.

Specifications:

- ◊ "Sneak-A-Peek" belt tension viewer for less down time
- ◊ Compensation spring "break-away" system
- ◊ Heavy Duty shield PTO shaft with overrunning clutch
- ◊ Hydraulic cylinder lift mechanism
- ◊ High blade tip speed for smooth, fast cutting efficiency
- ◊ 2 Year Limited Warranty on cutter bar

Easy changing hubs with 4-bolt disc cutting unit

Easily adjust belt tension without taking off outer cover

Heavy Duty A-Frame

Individual Shear-hub System on cutter bar

Disc Mower with Conditioner

The DM ROLL series offers the rubber roller conditioner to facilitate the drying of the grass. Its agile use makes it suitable for quick and safe work.

Offered in two sizes to meet every farm's need.

Swath Adjustment Deflectors

The DMC ROLL Mowers have two rear reflectors that adjust the swath width which can be minimum of 60 cm (2 ft.) or maximum of 120 cm (4 ft.)

Rubber roller conditioner (standard).

Prices and specifications subject to change without notice. Check discounts & availability before quoting. Product Designs May Differ Slightly Than What Appears in the Photographs.

Special Disc for Conditioner

The disc is more robust with a specific reinforcement that allows the launch of the product inside the ROLL rollers helping the work and therefore the forward speed.

Gear Transmission

The two rubber rollers are gear driven to provide continuous synchronization in the event of uneven flow of high-volume grasses.

Drum Mower

Height Cutting Kit

Tar River Implements' Drum Mowers have very few moving parts, are low maintenance and have a heavy built A-frame. The Tar River Drum Mower is a great economic alternative to the Disc and Sickle bar mowers while still giving a good cut. The BDR Series Drum Mower can mow at high speeds and offers reliable mowing in all conditions, easily cutting through tall and thick grasses. Available in 4 popular sizes, Tar River Implements has a perfect fit for your small hay operation. Additional cutting height achieved with optional Cutting Height Kits.

Drum Mower Benefits:

- ◊ Mow at High Speeds
- ◊ No Hydraulics Necessary
- ◊ Few Moving Parts & Easy Maintenance
- ◊ Great Alternative to Disc & Sickle bar Mowers for Small Hay Producers
- ◊ Easily Cuts Through Tall and Thick Grass
- ◊ Designed for Reliable Mowing in All Conditions

BDR Series Drum Mower Features:

- ◊ Heavy Duty A-frame
- ◊ 3 Blades per Drum (2 on the BDR-135 & 4 on BDR-210H)
- ◊ Compensation Spring "Break-Away" System
- ◊ High Blade Tip Speed for Smooth, Fast Cutting Efficiency
- ◊ V-Belt Drive
- ◊ Internal Overrunning Clutch
- ◊ Easy & Quick Blade Change

Sicklebar Mower

These double action Sickle Bar Mowers with an adjustable 3 point hitch ensure a sharp clean cut on any type of grass.

The safety breakaway bar helps protect the cutter from obstructions in the field.

Safety breakaway bar

Specifications:

- ◊ Three Point Hitch Cat.1 & 2
- ◊ Double Action cutter bar
- ◊ Heavy duty shielded PTO shaft
- ◊ High quality powder-coat paint
- ◊ Cuts at 90° up and 70° down
- ◊ Safety release
- ◊ Ideal for hay or ditch bank mowing
- ◊ Extra cutting blade included

Hay Tedder

The Tar River Tedder is built heavy in all the right places, this machine is designed to withstand the rigors of high-volume hay production.

The PRZ-3100 is a 10' tedder with 4"x8" tubing. This unit is a pull-type with a manual tilt and flat-bar tine arms.

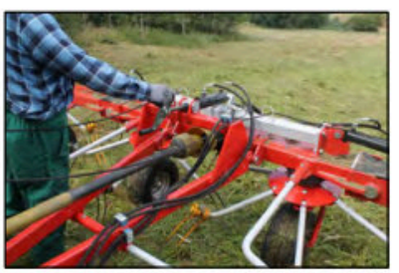

On the 18' PRZ-5500, large 18" tires give the tedder great floatation across uneven terrain. Adjustable angling allow boundary tedding. Thick-walled tubular tine arms hold up long after the flat bar style ones would have bent. Hydraulic tilt and fold come standard.

Thick-Walled Tubular Tine Arms

Adjustable Angle and Tilt

Hyd. Tilt and Fold

Prices and specifications subject to change without notice. Check discounts & availability before quoting.
Product Designs May Differ Slightly Than What Appears in the Photographs.

Specifications:

PRZ-3100

- ◊ 10' Working Widths
- ◊ Overrunning Ratchet Clutch PTO
- ◊ High Flotation Tires
- ◊ Heavy Built, Rectangular Tube-Frame
- ◊ Packaged 2 per crate
- ◊ Manual Tilt

PRZ-5500 (includes all features of PRZ-3100 plus)

- ◊ 18' Working Width
- ◊ Wheel Fenders on Inside Tires
- ◊ Road Transport tires
- ◊ Hydraulic Lift
- ◊ Can be angled for "close to" fence tedding
- ◊ Hydraulic Tilt
- ◊ Heavy-walled tubular arms
- ◊ Integrated Locking collars and hex shaft drive units
- ◊ Double plated rotor supports
- ◊ Adjustable Wheel Yokes—Swivel and Tilt
- ◊ One Hydraulic Remote needed
- ◊ Overrunning Ratchet Clutch PTO

Hay Tedder

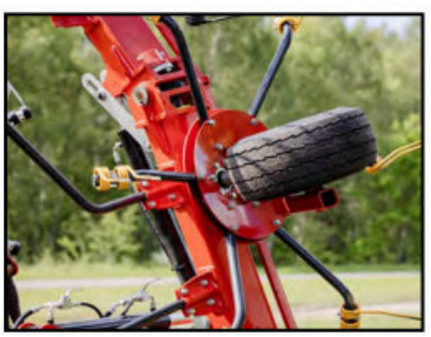

The **PRZ-7900** 6-basket tedder is the newest addition to Tar River's reliable PRZ Series—joining the compact **PRZ-3100** (2-basket) and the versatile **PRZ-5500** (4-basket) models. Designed for larger operations, the PRZ-7900 delivers increased coverage, rugged performance, and easy transport, making it an excellent choice for high-output hay production.

The PRZ-7900 rounds out Tar River's PRZ Series with a larger, more capable option for farms ready to scale up. Whether you're stepping up from the PRZ-5500 or starting fresh with high-acreage demands, this tedder delivers the performance and reliability you expect from the Tar River name.

Hydraulically controlled angled tedding is standard.

Prices and specifications subject to change without notice. Check discounts & availability before quoting.

Rotary Rake

SINGLE AND DOUBLE ROTOR CONFIGURATIONS

Enorossi's Single & Double Rotary Rakes come standard with pneumatic pivoting wheels and heavy, tubular tine arms that are removable for transport. The RR-350 has 11 rotor arms that sweep cleanly all hay types in any condition.

The ENODUO 780 is a center delivery double rotary rake with an adjustable working width from 23' to 25'6". It comes with four wheels per rotor for excellent stability on uneven ground and is semi-mounted with rear steering wheels for maximum maneuverability. The gentle raking action ensures high nutrient levels remain on the crop and in the bale - not in the field.

Tandem Wheel Axles

Heavy Duty, Sealed Oil Bath G-box

Transport Position

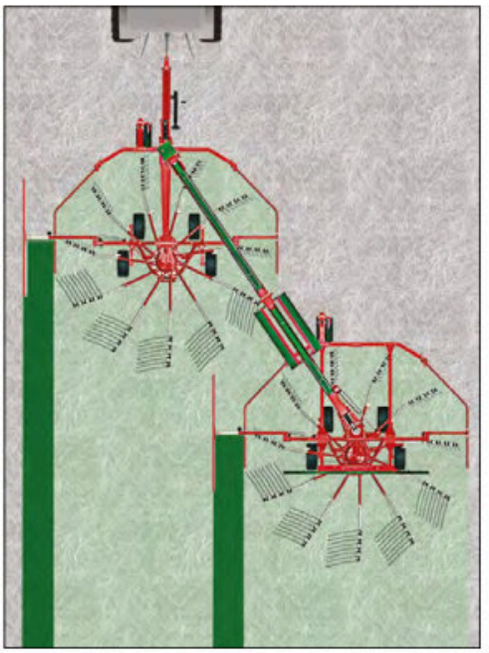

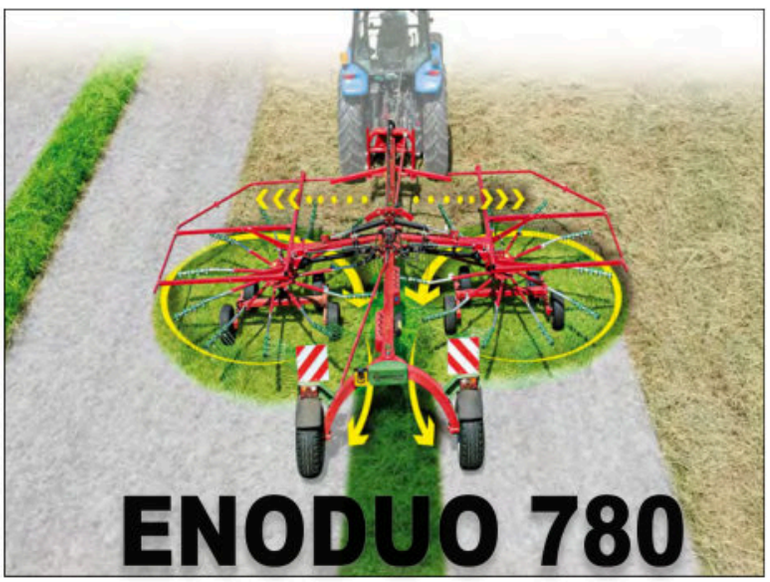

Specifications:

- ◊ Extra heavy duty frame and components
- ◊ Hydraulic transport lift standard
- ◊ Heavy-duty, sealed oil bath gearbox
- ◊ Large, high floatation tire
- ◊ Standard tandem axle
- ◊ Removable tine arms
- ◊ Great economic option for those smaller-range tractors and hilly conditions
- ◊ 20" Ground Clearance Hydraulic Lift for transport

Prices and specifications subject to change without notice. Check discounts & availability before quoting.

Rotary Rake

Tar River Implement's Single Rotary Rake comes standard with hydraulic height adjustment and heavy tubular tine arms that are foldable for transport. The ZRG-420 has 11 rotor arms that cleanly sweep all hay types in any condition. Wide angle constant velocity PTO shaft come standard. Replaceable wheel hubs ensure transportation is not a problem. The gentle raking action ensures high nutrient leaves remain on the crop in the bale, not in the field.

The ZRG-360 is a 3-point version with a 9 arm gearbox for use in tighter areas where a pull-type will not allow you to reach all areas of the field.

ZGR-420

Tandem Suspension
Allows the rotor to float over any terrain while following ground contour perfectly. Replaceable wheel hubs on ZGR-420

Foldable Tine Arms
Thick-Walled tubular tine arms, 4 or 6 of which fold for transport. Each arm is equipped with heavy tines.

Specifications:

- 11'10" and 13' 9" working width
- 15x6.0-6 Tires on ZGR-360
- 18.850-8 Tires w/ transport hubs on ZGR-420
- Hydraulic Transport Lift on ZGR-420
- Thick-walled, tubular tine arms
- Heavy-Duty, sealed oil bath gearbox
- Strong & Heavy Frame to prevent bouncing
- Standard Tandem Axle
- Foldable Tine Arms for Transport
- Ratchet Clutch protection
- Wide Angle (CV Joint) on ZGR-420

Tedder Rake

Enorossi's DR420 –2 Rotor Tedder Rake is ideal for medium-sized and large farms requiring a multifunctional machine. It's the ideal solution for farmers who want to obtain both central and lateral windrows depending on the quantity of the harvested material. It can perform many different tedding and raking functions always with optimal processing of your high-quality forage. Standard equipped with cardan shaft, protections, inverter and twin wheels. The high working speed of almost 10 mph allows outstanding performances.

Lateral Windrow

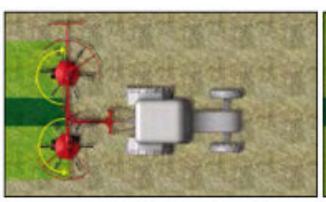

Tedding

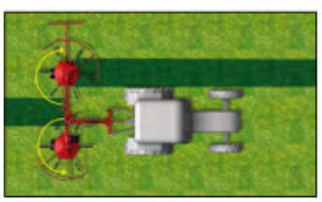

Spheroidal cast iron cam and steel rollers.

Twin pivoting wheels

Center Windrow

Windrow Turner

R-Rake

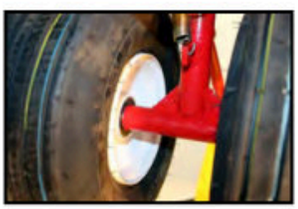

The RR-248 was designed with the needs of the small hay farmer in mind. Ted and Rake with a single machine.

With a 48" working width, this rotary rake is capable of delivering an excellent quality of performance while still being compact enough to be used with a 20 HP tractor.

The high-quality but affordable materials make this rake durable and a great choice for budget farms.

With the RR-248's combination of performance, durability, and affordability, it is the next-best-thing for small hay farms.

BELT RAKE

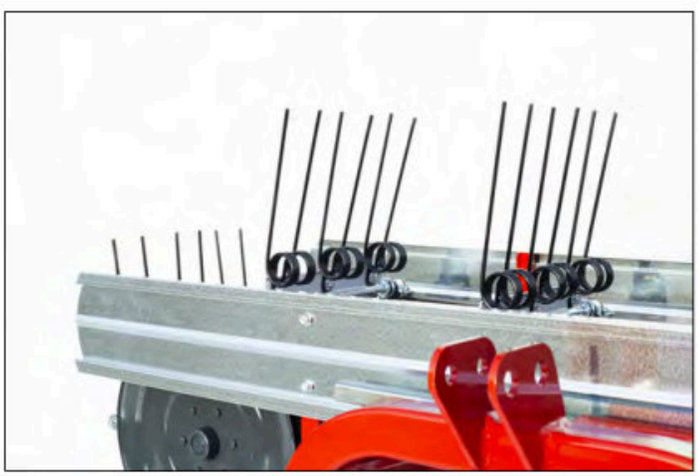

Two machines in one - rake and ted with the Tar River Implements Belt Rake! With its compact design and versatile functionality, the Belt Rake is an ideal hay tool for the small to medium sized hay producer. Great durability and low maintenance as well as simplicity of use are just a few benefits for this tedder-rake combination Belt Rake.

The D150-3 is a low profile design that can operate with any HP tractor. Simple and easy to use with very low maintenance.
The 3 tines per row make clean a sweep of your pasture.
Fast adjustments allow one to go from tedding to raking in a breeze.

D180-4 comes standard with 4 double tines per row and all the features of the D150-3.
This extra set of tines is helpful in heavier hay crop conditions.

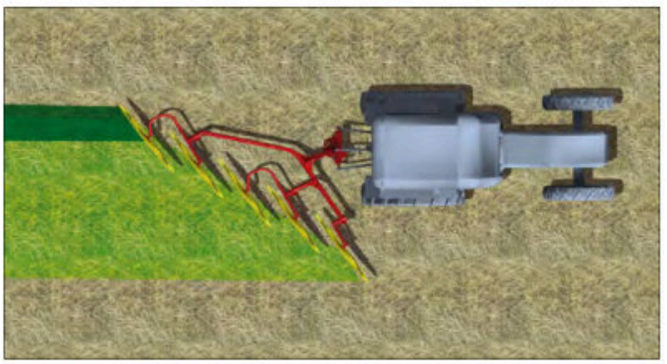

Specifications:

- ◊ Heavy square tubing construction
- ◊ Heavy duty belts for long life
- ◊ Rear Height adjustment wheels
- ◊ Front Pivot wheel

3 POINT WHEEL RAKE

An easy and efficient hay rake suitable for any type of forage. The spring system of the tool holder allows raking wheels to adapt to any type of ground with the correct pressure and without affecting the forage quality. Independent and interchangeable raking wheels mount on tapered roller bearings. Teeth made of flexible steel.

Specifications:

- ◊ Heavy tubular frame with strategically placed bracing
- ◊ Molded steel hubs with tapered roller bearings
- ◊ 7 mm heavy spring steel teeth
- ◊ High quality powder-coat paint

RP3C has a specifically designed A-frame for smaller sub-compact tractors.

Perfect tool for windrow turning or raking pine straw.

BAT RAKE

HIGH CLEARANCE CARTED RAKE

Enorossi's Bat Rake is the new standard for Hay Rake Caddies. Available in 8, 10 and 12 wheel sizes, the Bat Rake comes in a Single Wheel configuration allowing each individual raking wheel to follow all types of ground contours. Equipped with 60" diameter raking wheels and 7.5 mm tines, the Bat Rake's raking wheels are arguably the best raking wheel on the market today. The heavy spring tines, provide for excellent wear and strong resistance to breakage. The heavy-built frame and high profile of the Bat Rake give a full 32" of ground clearance allowing it to rake in all types of ground contours in heavy hay conditions.

Specifications:

- ◊ Independent rake wheel arms to follow all ground contours
- ◊ High Clearance - 32" of Ground Clearance
- ◊ Perfect for heavy hay
- ◊ Easy windrow width adjustment
- ◊ Heavy built and low maintenance
- ◊ 60" raking wheels with 7.5 mm tines
- ◊ Heavy built and low maintenance
- ◊ 205/70-15 tires standard
- ◊ Heavy tubular frame with strategically placed bracing
- ◊ Molded steel hubs with tapered roller bearings
- ◊ Double-action hydraulic cylinder

MINI ROUND BALER

Perfect for the small farmer who wants to produce their own hay. It's low cost and a time saver. The affordable SRB-870 or SRB-870NW allows you to control when you bale, not others. The auto twine binding system alerts the operator, who simply pushes a button, to open the rear door hydraulically, thus dropping the bale.

The net wrapping system of the SRB-870NW works the same way except with even better weather resistance, and reduction of loss from heavy handling with net wrapping. The baler comes with a self-contained hydraulic pump. Once the PTO driveline is attached, only a connection to the tractors' 12V battery is needed to operate the baler making it easy and mess free.

SRB-870 Twine Baler

- 3 pt. Category 1 Hitch
- 18-30 HP
- Electronic Control Box
- Includes 1 Roll of 8500' Twine

SRB-870NW Net Wrap Baler

- 3 pt. Category 1 Hitch
- 18-30 HP
- Electronic Control Box
- Includes a starter roll of net wrap (approx. 50 bales)

SELF-LOADING

Upgrade your baling operation with the Econo-Wrap EW-1800TA, a streamlined wrapper designed for solo operators. With the ability to wrap bales up to 4' x 5', this fully automated machine requires only one button push to initiate the wrapping process.

Effortlessly fit the bale into the lifting arm cradle, press the button and watch as the EW-1800TA takes over- lifting the bale onto its turntable and beginning the automatic wrapping process. Enjoy the freedom to drive up to the next bale while the machine continues wrapping, dumping it only when fully finished.
The Econo-Wrap EW-1800TA is the perfect partner for your baling needs.

CROP SEEDER

Tar River Implements offers an economical solution to your seeding needs.
The DRL-048 & DRL-072 come with double opening discs to plant grass, corn, beans, oats and more.
The seeder comes equipped with two stainless steel boxes with closeable slides for each row.
Apply fertilizer to each row while planting.
The DLR is designed to be used as a secondary tillage tool.
Ground conditions need to be worked up or tilled prior to use.

ATV MinimumTill Drill

The new TRD-PT55 ATV Minimum-Till Drill, combines professional seeding performance with ATV convenience. Featuring seven double-disc openers on 7.5-inch spacing, it provides accurate seed placement with minimal soil disturbance. Weighing only 750 pounds, it is easily pulled by most ATVs while handling a wide range of seeding applications.

The split stainless-steel hopper includes front seed/fertilizer cups and rear adjustable variable-rate seed cups, allowing accurate planting of seeds ranging from soybeans to radish. A standard electric actuator makes attachment, transport, and operation quick and convenient.

Whether planting food plots, cover crops, or pasture grasses, the TRD-PT55 delivers dependable performance in a compact, versatile package. *Assembled in USA*

NO-TILL DRILL Press Wheels

Introducing the SAYA No Till seeder with Press wheel configuration. All the same great features as the SAYA models with cage roller basket, but now available with press wheels.

Quick Hitch Compatible

The heavy spring loaded press wheel precisely follows the ground splitting coulters and double disc assemblies to ensure excellent seed to ground contact for superb germination.

The SAYA-505PW and SAYA-507PW come with 7 or 10 rows of coulters and double disc openers. Both units have 2 stainless steel seed boxes. The SAYA-907PW has all the same features of the SAYA-907 but with press wheels to provide enhanced seed coverage.

Assembled in USA

NO-TILL DRILL

Quick Hitch Compatible

The SAYA-505 (55") & SAYA-507 (78") got a facelift! They are still cost effective Light Duty No-Till Drills with front coulter package, but with new and improved features. The 505 has 7 and the 507 has 10 swept back spring loaded double disc openers making seeding easy and economical. The Large seed and Legume cups allow for precise seeding in a no- till operation. ***Stainless steel hoppers*** prevent rust and keep your drill in fine working shape for years to come.

The NEW SAYA-907 has a 75" working width and comes with a 3 compartment seedbox which contain 3 different seedcups for seeding of any type of seed. The front section comes with a dual section seedcup that splits between large seeds (corn and soybean sizes) to grass seeds such as wheat and rye. The middle section has a flow adjustable gearbox with special gear seedcups designed for the fluffy warm season Native grasses. There is no need to change chains and sprockets to adjust the flow. A simple handle on the gearbox smoothly increases or decreases seed output.

Both the front and middle seedcups feed into a heavy cast iron double disc opener. The rear box contains high precision metering seedcups for the tiny legume seeds. Seeds dispersed from these cups are spread out behind the machine in order to prevent them from becoming buried too deep.

Pull Type NO-TILL DRILL

The SAYA Pull-Type No-Till Drills are ideal for food plots, cover crops, pastures, and conservation seedings when using an RTV, UTV, or smaller tractor. Designed for easy operation and dependable performance, they provide accurate seed placement and excellent germination.

The PT505 features an electric actuator for quick transition between working and transport positions, while the PT507 and PT907 models come equipped with a hydraulic synchronized cylinder lift system. The SAYA Pull Type utilizes double-disc openers and ground-cutting coulters for improved penetration in tougher field conditions.

Heavy-duty spring-loaded press wheels ensure excellent seed-to-soil contact for fast, uniform germination. Built for durability and precision, the SAYA Pull-Type Drill lineup delivers professional seeding results in a compact, easy-to-pull package.
One hydraulic remote required. *Assembled in the USA*

DISC HARROW WITH SEEDER

The DHDS-63 is a durable disc harrow with seeder. It is equipped with 10 disc heads in the front and back, which efficiently cuts and pulverizes the soil, creating an ideal seedbed for optimal germination. With its adjustable disc heads and precise seed metering system, the DHDS-63 provides accurate and uniform seed distribution. The front box distributes the seed into the disced soil. This allows for a deeper planting depth. The rear seed box has the legume seed cups and the seeds are distributed behind the disced area and rolled in the ground by the rear roller.

Quick Hitch Compatible

GREENSCAPE

560 SERIES

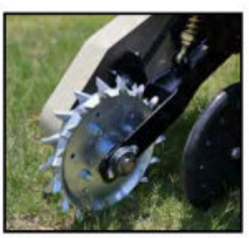

The Greenscape 560 Minimum Till Drill delivers proven reliability backed by over 20 years of American-made seeding excellence. High-precision seed boxes and flow control make planting fast, accurate, and effortless across a wide range of seed sizes and planting conditions. Built heavy-duty yet compatible with tractors as small as 25 HP, the Minimum Till Drill is perfect for deer food plots and precision pasture seeding. It features 8 double disc openers on 7" spacing, precision large-seed cups, an integrated legume seed box, and a rear press wheel that ensures excellent seed-to-soil contact for strong, uniform stands.

GREENSCAPE

750 SERIES

High Precision Large Seedcup

Smaller Legume Seedcup

Greenscape 750 FOOD PLOTTER No-Till Drills are the latest in the Greenscape family of the most reliable seeders produced in the US over the past 20 years. High precision seed boxes and flow control make seeding a breeze with the ability to drill many different varieties and sizes of seed into all types of planting conditions.

Heavy built, but constructed to be able to be handled by tractors as low as 40 HP, The FOODPLOTTER line is designed for planting deer food plots around woodlands or high precision pasture seeding in the fall.

With 10 coulters at 7.5" spacing, high precision large seed seedcups accurately drop seeds into the openings. A separate Legume Seedbox with high precision seedcups accurately drop seed along a "splash pan" that rains the small seed over the soil. A packer roller system with Nylon rings or optional cast iron rollers help press the seed into the ground and close up the cuts made by the disc openers.

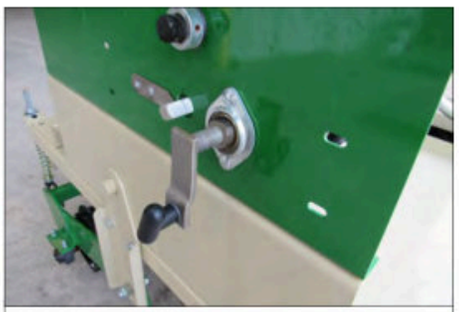

The NEW 750-4 has all the same great qualities of the 750-2 but with a Warm Season Native Grass Box. Perfect for metering Virginia Wildrye, Yellow Indiangrass, or a variety of other native grasses!

Specifications:

- ◊ Three Point Hitch Cat. 1&2
- ◊ Heavy tubular frame construction
- ◊ All ground driven, no PTO shaft or gearbox to maintain
- ◊ Precise seed metering cups with individual clean out gates
- ◊ Rear roller packer rings to firm and smooth seedbed
- ◊ Water tight seed box with agitator shaft - calibration chart and seeding rate chart
- ◊ 10 Cast Iron double disc openers spaced at 7.5"
- ◊ Spring loaded coulters to cut through tough ground
- ◊ Optional Cast Iron roller rings

GREENSCAPE

The Greenscape represents a totally new concept in seeding. Being neither a grain drill nor a PTO driven seeder, the Greenscape effectively prepares the soil, drops and lightly covers the seed, and then firmly presses the soil for a perfectly prepared seedbed. It is designed to achieve a perfect pattern across the working width of the machine; no row effect as with drills or knife type over seeders.

Ground driven – no PTO shafts or gearboxes to maintain, and requires only a 35 HP (50 HP on 84" model) tractor to operate. When equipped with the optional precision small seed box and Native Seed box the Greenscape will plant virtually any type or size seed at any rate.

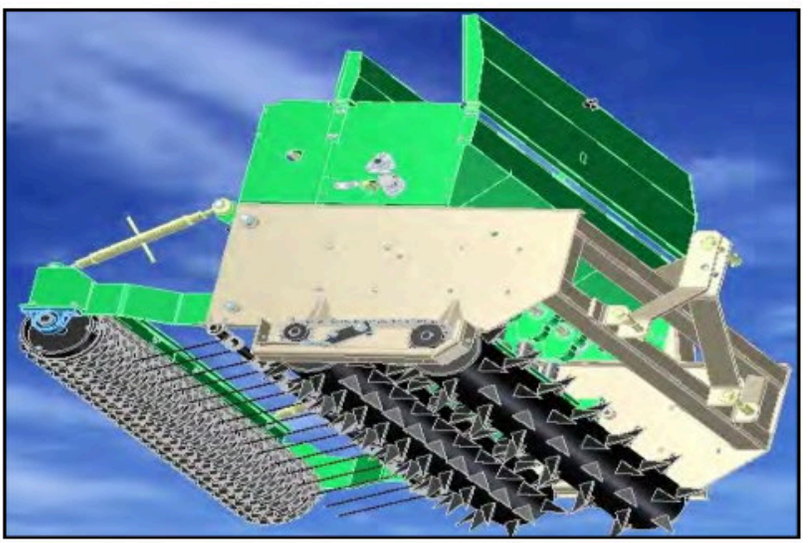

This machine will seed into all conditions, including primary seeding into prepared ground or overseeding into existing vegetation. Available in 60" and 84" working widths.

Specifications:

- ◊ Three Point Hitch Cat. 1&2
- ◊ Heavy tubular frame construction
- ◊ All ground driven, no PTO shaft or gearbox to maintain
- ◊ Precise seed metering cups with individual clean out gates
- ◊ Rear roller packer rings to firm and smooth seedbed
- ◊ Water tight seed box with agitator shaft - calibration chart and seeding rate chart
- ◊ Driven spiked rollers crumble soil just enough for perfect seed-to-soil contact
- ◊ Exclusive Torque Arm - keeps constant adjustable down pressure on rear cultipacker
- ◊ Broadcast across full width of working area - no row effect as with PTO driven, knife type machines or sod drills

Benefits:

- ◊ High ground speed – *up to 7 MPH*
- ◊ Full width broadcast coverage
  NO ROW EFFECT
- ◊ Seed or overseed in any condition
  - Fields
  - Groomed Turf
  - Prepared ground
- ◊ Abrasive-Resistant mining steel tines for extremely high wear
- ◊ Front Roller aggressively drives second roller 42% faster
- ◊ High quality – High precision seed cups for precise seed distribution
- ◊ Seed disengagement system for aeration & Seedcup safety shear pin
- ◊ Reinforced Nylon or Cast Iron corrugated roller rings
- ◊ Quick Hitch compatible reinforced three-point (Cat 1 & 2)
- ◊ Available Hoppers
  - *Standard Large-Seed Box*
  - *Precision Legume Seed box*
  - *Native Grass Seed Box*
  - *Stainless Steel Fertilizer box*

CORN/SOYBEAN PLANTER

Tar River Seed Planter is an excellent choice for planting Corn, Soybean, Sorghum or Millet. Built to last with stainless steel seed and fertilizer hoppers the CSP-2R or CSP-4R are cost effective units for small farmers. Units come standard with Corn and Soybean plates, optional Sorghum and Millet plates are available. The SCP-4R 4-row units comes standard with hydraulically lifting row markers, which requires 1 remote. Rows are spaced at 36" during assembly but are adjustable.

Row spacing adjustable from 22.5" min - 30" max.

CRIMPERS

The Tar River Implement Roller Crimper is a tool designed to terminate cover crops by crimping the stalk rather than cutting it during its “dough stage”. This process has several benefits, including the conservation of soil moisture, reduction of erosion, lessens the need for herbicides and addition of organic matter to the soil. It also suppresses weed growth and helps to cool soil temperatures during the summer months.

It is available in an 6’, 8’ and 10’ working widths and is a useful tool for farmers and agricultural professionals who want to manage their soil health.

Model	Working Width	Overall Width	Min. HP	Cat. Hitch	Weight (lbs.)	Max Weight w/ Water	LIST PRICE

BALE UNROLLER

The Tar River Implement Bale Unroller is proudly made in the USA. It is designed to mount easily on your tractor's 3-point hitch, grips the bale at both ends and rotates on a central axis, using ground friction to unroll hay like a carpet—no additional tools needed. Ideal for feeding large round bales, it reduces waste by unrolling only what cattle will eat in an hour. Feed from the tractor seat while minimizing manure buildup and naturally spreading seeds across your pasture.

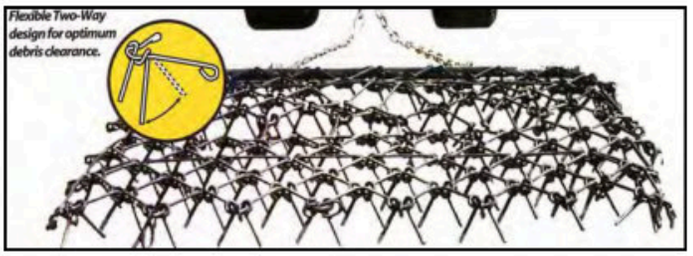

Hydraulics are standard though not shown in image.

3 PT. FLAIL MOWERS

Tar River Implements proudly offers versatile 3-point mounted flail mower models designed to tackle a wide range of mowing applications with ease and efficiency. For smaller tractors, the TREF Sub-Compact Series is the perfect fit—engineered for tractors up to 25 HP, delivering reliable performance in a compact package. For those requiring a bit more power, the TRMF Compact Series is built for tractors up to 45 HP, offering enhanced durability and cutting capacity. Available in cutting widths ranging from 53" to 77", both models are built with rugged construction and European-inspired design, making them ideal for everything from grassy fields to light brush. Whether you're maintaining pastures, orchards, or roadside ditches, Tar River flail mowers are ready to handle all your mowing needs with precision and dependability. *Optional : Y blades available through Parts Department.*

TREF SERIES–LIGHT DUTY

Specifications TREF:

- ◊ Cat 1 hitch
- ◊ Perfect for maintaining all types of grassy areas.
- ◊ Perfectly design for Sub compact tractors. All units come equipped with overrunning clutch integrated in the gearbox.

Available in **53**" and **61"** working widths.

TRMF SERIES–MED. DUTY

Specifications TRMF:

- ◊ Cat 1 Hitch
- ◊ Center Mount
- ◊ Heavy Cast Hammer blades for cutting in tough conditions.
- ◊ 4 Belt drive configuration
- ◊ Adjustable Height Control rear roller.
- ◊ Mowers come equipped with overrunning clutch integrated in the gearbox

3 PT. FLAIL MOWERS

STAR DISCOUNT STRUCTURE

FORZA

Introducing the new line of FORZA flail mowers—European-built and backed by decades of manufacturing experience. The COMET Series is designed for compact tractors under 35 HP and is available in 51" and 61" cutting widths, making it ideal for property maintenance, orchards, and vineyards. Joining the lineup is the GALAXY, formerly known as our trusted FLM model, now refreshed with new paint and FORZA branding. Built for larger tractors up to 60 HP, the GALAXY comes in 71" and 81" cutting widths, with the 81" model featuring standard hydraulic offset for added versatility. Both series reflect FORZA's long-standing commitment to quality and performance in every pass.

COMET SERIES:

- ◊ Cat 1 hitch
- ◊ Perfect for maintaining all types of grassy areas.
- ◊ Perfectly design for small compact tractors. All units come equipped with overrunning

GALAXY SERIES:

- ◊ Cat 1-2 Hitch
- ◊ Galaxy 87H comes standard with hydraulic side shift
- ◊ Heavy Cast Hammer blades for cutting in tough conditions.
- ◊ 4 Belt drive configuration
- ◊ Adjustable Height Control rear roller.

ROTARY CUTTERS - MEDIUM DUTY

Quick Hitch Compatible

The ARC Medium Duty Rotary Cutters are ideal for backfields, trails, and wildlife paths. The 6' model cuts up to 1" thick brush with an 11GA, 7.5" deep deck; the 7' model cuts up to 2" thick with a 10GA, 9.8" deep deck and reinforced 3/16" sides. Cutting height adjusts from 1.5"–11" via a laminated tailwheel (dual on 7'). Heat-treated blades pivot on a heavy-duty stump jumper to protect the gearbox. Both models feature a cast iron gearbox with forged gears and slip clutch protection. The 6' comes with Cat. 1 clevis pins; the 7' fits Cat. 1 & 2. Quick Hitch compatible and suited for 28–65 HP (6') and 45–90 HP (7'). Standard chain guards included.

CULTIPACKER

Tar River Implements now has three sizes of Cultipackers available for your landscaping needs. It is designed to firm and level the soil after tillage or seeding, creating the ideal seedbed for better germination and seed-to-soil contact. As the machine is pulled across the field, the heavy rollers and notched packer wheels break up clods, press small rocks into the soil, and leave a smooth, evenly packed surface. This packing action helps retain moisture near the seed while reducing air pockets that can hinder germination. The packer wheels are 9 1/2" cast iron steel. Category 1 quick hitch compatible.

Model	Working Width	# Roller Rings	Weight (lbs.)	LIST PRICE
CP-48G	48"	22	360	$2,226

FIELD CULTIVATOR

Create an ideal seedbed in one efficient pass with the Tar River Field Cultivator. Designed to till, level, and finish simultaneously, this implement helps reduce fuel usage while saving valuable time in the field. Available in working widths of 6 foot and 8 foot.

Quick Hitch Compatible

Lighter in weight and easier to pull than a similar-sized disc, the TRFC offers excellent versatility for a wide range of uses including row-crop preparation, bedded fields, orchards, vineyards, arena maintenance, and many other tillage operations.

NEW!

GARDEN BEDDER

Quick Hitch Compatible

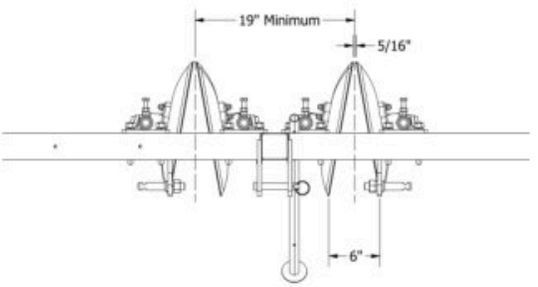

The Tar River Garden Bedder is designed to create clean, well-formed planting beds for vegetables, tobacco, berries, and specialty crops with ease and efficiency. Built with a heavy-duty frame and adjustable bedding components, the unit produces uniform raised rows that improve drainage, soil warming, and seedbed preparation for better crop performance.

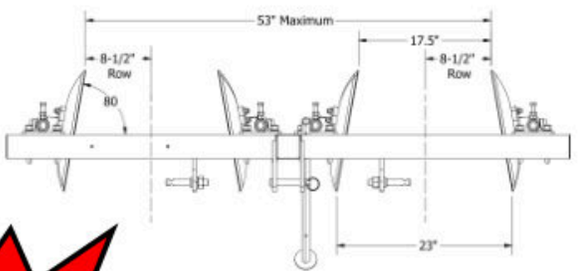

Ideal for small farms, market gardens, and larger vegetable operations, the Tar River Garden Bedder is simple to adjust for varying row widths and soil conditions. The optional ripper attachment helps break up compacted soil beneath the bed, improving root penetration and water absorption while reducing hardpan buildup.

With durable construction and easy operation, the Tar River Garden Bedder delivers professional-quality beds

BOX BLADES

Quick Hitch Compatible

The 100 Series 4′ Box Blade is the go-to tool for working gravel, topsoil, mulch, and manure. Its 4 ripper shanks on a 2×4″ steel beam adjust to three depth levels, with 6″ reversable and replaceable front and rear blades. An 18″ box depth and 12.75″ moldboard height provide solid capacity. Cat. 1 and Quick Hitch compatible, it suits tractors 15–28 HP.

The 200 Series Box Blade handles tougher grading, ruts, washouts, and driveway leveling. It features five or six 4-position heavy-duty ripper shanks on a rigid 4″ square tube beam with 5/16″ side plates. The 22″ box depth and 16.95″ moldboard adds capacity, while the rear blade , which is replaceable and reversable, can push material in reverse. Cat. 1 and Quick Hitch compatible, it's ideal for 18–45 HP tractors and available in 5′ and 6′ models.

BOX BLADES

Quick Hitch Compatible

Tar River Implements has Box Blades available in eight popular sizes. The Sub-Compact Box Blades come in 48" and 60" working widths and 1/4" side plates. The Medium Duty Box Blades come in 60" and 72" working widths with 3/8" side plates for 60" model and 1/2" side plates for the 72". Our heavier duty 84" and 96" working widths come with 1/2" side plates and a sturdy A-Frame to get the job done. Clevis hitches and durable design for the Tar River Box Blades make them a great tool for all around dirt maintenance.

The front and rear replaceable 6" scraper blades allow for quick and easy replacement making the Tar River line of box blades an excellent choice for all your dirt moving needs!

WOOD CHIPPERS

Quick Hitch Compatible

The Tar River Wood Chipper is the perfect tool to help you clear your land of fallen limbs and branches. Use your wood chips to create beautifully covered flowerbeds and natural areas in the yard. Wood chips not only look nice, but they also help regulate soil temperature, retain moisture and even improve plant growth by helping release necessary nutrients into the soil.

The BWC-040EC is a manual feed chipper. It is PTO driven and available in a 4" chipping capacity.

The BWC-H Series are Self-Contained Hydraulic Feed Chippers. This series is available in 4", 6", and 8" chipping capacities. These chippers come equipped with internal hydraulic pumps that are run by the tractor PTO and require no external hydraulic feed.

Introducing the BWC-07DH to the Tar River Implements line of chippers. This chipper is a self contained Dual Hydraulic Roller Feed chipper. It has a 7" chipping capacity but a larger opening on the chute.

BUCKETS

Model	Description	Typical Uses
RB	Rock Bucket	Essential attachment for separating rocks from dirt as well as for clearing and building sites. Ideal for sifting out large rocks and debris. Catches rocks 3" plus.
LP	Low Profile Bucket	High visibility specifically designed for skid steer loaders. For general purpose grading and moving dirt.
LB	Long Bottom	Built heavy for large skid steer applications. An excellent attachment for precise grading and construction purposes. 35 1/2" deep to allow for easy view of front edge while working.
CU	Compact Utility	All around general purpose specifically made for tractor loaders.
XMB	Material Bucket	Material /Snow / Litter bucket is used for moving litter, chips, snow and other light material.
4N1	4-IN-1 Bucket	Multi-purpose bucket for grappling, dozing, backfilling , loading, digging and fine grading
DB	Disbursement Bucket	Bucket attachment for carrying concrete, filling grain feeders, moving gravel and dirt. .85 Yard struck Capacity
HDB	High Dump Bucket	This bucket allows an extra 3 feet of dumping height for full loading capacity of truck or spreader.
HDGB	Grapple Bucket	Multi-purpose tool combining bucket and grapple
SB	Stump Bucket	Attachment bucket designed to dig around stumps with its narrow cutting surface for easy stump removal. Great for digging narrow ditches for footings or storm ditches.

GRAPPLES

Model	Description	Typical Uses
RG	Rock Grapple	A fundamental implement for separating rocks from dirt as well as for contractors clearing a lot for site building. It is also essential for storm damage clean up. The Rock Grapple is ideal for sifting out large rocks and debris. It is excellent in pastures, lawns or construction sites. It will catch any rock or piece of debris that is larger than 3 inches
SBG	Stump Bucket	Used for prying and removing stumps with the gripping power to secure the load
RG	Root Grapple	Moving logs, brush, rocks or many other types of debris. Available in single and double grapple configurations CRG (< 40 HP) HDRG1 (35-50 HP) HDRG2 (40-60HP) XRG (60+ HP)
BG	Brush Grapple	Deigned for tearing into roots, trash and rubbish and loading the debris into trucks or wagons. Designed to roll debris into tight piles.
HFG	Fork Grapple	An essential tool on the farm, logging and construction industry. Great for moving logs, fence posts, pipes and debris.
FG	Log Grapple	Unique rounded tine design to easily hold large logs, pipes, fence posts and culverts.

VIBRATORY POST DRIVER

Tar River Manufacturing Post Drivers are designed to efficiently drive posts and break concrete on your skid steer. The vibratory action makes quick work driving posts into the ground. Both models come with a 8" post pad.

The action of the "jackhammer" drive allows you to drive posts with minimal post splitting common on typical drivers. The cup design of the post pad keeps the post positioned and allows it to be pulled or pushed straight if it begins to angle off course while being driven.

Model	Description	Ft. lbs. Energy	GPM	Post Pad Size	Mount	Weight	
VIBRATORY POST DRIVER							LIST PRICE
PD-68-200	Post Driver	750 lbs.	10.5-19	8"	Uni. Skid Steer	1,200 lbs.	**$5,315**
PD-75-240	Post Driver	1,000 lbs.	13-24	8"	Uni. Skid Steer	1,650 lbs.	**$6,255**

LAND PLANE

Grade your land professionally with the Tar River land plane.

Built with heavy steel, this leveler will make short work of your grading needs on your farm, construction site or driveway.

Available in 6 and 8 foot working widths, the TRLP is the ideal tool for tackling many landscaping jobs.

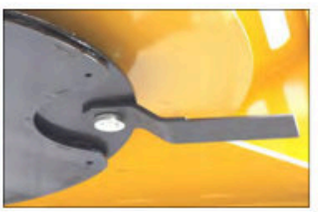

Model	Description	Mount	Weight	LIST PRICE
TRLP72	72" Land Plane	Universal Skid Steer	209 lbs.	**$1,515**
TRLP84	84" Land Plane	Universal Skid Steer	243 lbs.	**$1,855**

MINI EXCAVATOR ATTACHMENTS

Designed for power, durability, and versatility, this mini excavator brush cutter is built to tackle demanding land-clearing jobs. Its open-ended deck and dual push bars allow operators to efficiently knock down and cut heavy brush, tall grass, and small trees up to 4 inches in diameter.

The innovative bolt-on mounting system makes changing machines simple. Instead of replacing the entire attachment, you only need a new mounting plate to fit your next excavator—saving both time and money. Additional hydraulic motor configurations will also be available to support a wider range of equipment.

Specifications

- ◊ 44-inch cutting width
- ◊ Cuts brush and trees up to 4 inches in diameter
- ◊ Three 5/8" × 6" AR500 reversible cutting blades
- ◊ Heavy-duty 3-blade rotor design
- ◊ Three rows of carbide-tipped mulching teeth for superior material processing.
- ◊ Recommended hydraulic flow: 14–25 GPM
- ◊ Reinforced construction featuring:
  - •3/16" main deck
  - •3/8" deck bracing
  - •3/8" internal wear bars
- ◊ 8-foot Parker hydraulic hoses
- ◊ Flat-face hydraulic couplers
- ◊ Double-sided, reversible blades for extended service life
- ◊ 65 HP direct-drive Omni gearbox
- ◊ Hydraulic motor relief block for added protection
- ◊ Heavy-duty slotted motor cover
- ◊ Bolt-on attachment mounting plate for easy machine compatibility

LIFT-SAFE IMPLEMENT HANDLER

Put down the chains and make moving and loading equipment a SAFE one-man job.

Belco Resources Equipment's Implement Handler was developed to make moving three point implements simple and worry free. The days of using chains and two people just to move a single rotary cutter, rear blade, landscape rake, etc. are over!

With only one person, you can safely move most three point implements quicker, safer and easier.

Run Forks In
